Experience Real History™: Alamo Edition Receives Prestigious Mobile Excellence Award

(SAN ANTONIO, TX – February 28, 2019) – Experience Real History™, along with production partner Altuit, were winners at the 11th Annual Media Excellence Awards, taking home the top award for Excellence in Augmented & Virtual Reality for their Experience Real History: Alamo Edition suite of apps and interactive products. Often referred to as the Oscars of technology, the MEAs are the largest and most prestigious global technology awards program.

Experience Real History is a tech company that is at the forefront of creating how history is shared for future generations. Their formula for success is utilizing mixed reality experiences to combine historical scholarship with art and technology—bring history to life in a way that captures the attention of audiences young and old, while appealing to diverse learning styles.

Experience Real History offers a suite of tech-enabled products including a new book, *The Battle of the Alamo, A 3D Interactive Adventure in Augmented Reality*; Reality Boards; trading cards; and a full-scale walkabout app that can be used at The Alamo or in one's own backyard. A new suite of entertaining apps and technology products focused on the Civil War era and the Battle at Gettysburg will begin roll out in June 2019.

The mission of Experience Real History aligns with the goals set forth by the MEAs, to honor those who create and use ground-breaking technology to better lives, while also celebrating the hard work, determination, perseverance, creativity, impact and brilliance in the leadership within the companies that helped create the new world in which we live in today.

About Experience Real History

Experience Real History™ (ERH) is an award-winning tech company based in San Antonio that is disrupting how people learn with hyper-real experiences forged from cutting-edge technology. Deviating from traditional storytelling, ERH innovates with immersive, non-linear experiences that dive into other eras and worlds utilizing technology like augmented and virtual reality. Users are transported to places that have only existed in their wildest imagination, taking a quantum leap in both time and belief—and becoming part of the action themselves.
