

Rigaku Presents Latest X-ray Analytical Instruments at the 2019 APS March Meeting

Rigaku Corporation
9009 New Trails Drive
The Woodlands, Texas
USA 77381-5209

Rigaku is exhibiting at the March 2019 American Physical Society meeting at Booth #136

March 5, 2019 – Boston, MA. [Rigaku Corporation](#) will be attending the March 2019 American Physical Society ([APS](#)) meeting, representing its diverse range of X-ray analytical instrumentation. The meeting is taking place March 4-8 at the Boston Convention and Exhibition Center ([BCEC](#)).

The meeting will host 11,000 attendees and showcase research from industry, academia, and major labs for a global audience of physicists, scientists, and students.

Rigaku provides the world's most complete line of X-ray diffraction ([XRD](#)) and X-ray fluorescence ([XRF](#)) instruments and components, and is exhibiting at booth #136.

Systems include the Rigaku [MiniFlex](#) XRD and [Supermini200](#) wavelength dispersive X-ray fluorescence (WDXRF) benchtop systems, and the [SmartLab](#) multi-purpose diffractometer with small angle X-ray scattering ([SAXS](#)) and in-plane capabilities.

About Rigaku

Since its inception in Japan in 1951, Rigaku has been at the forefront of analytical and industrial instrumentation technology. Rigaku and its subsidiaries form a global group focused on general-purpose analytical instrumentation and the life sciences. With hundreds of major innovations to their credit, Rigaku companies are world leaders in X-ray spectrometry, diffraction, and optics, as well as small molecule and protein crystallography and semiconductor metrology. Today, Rigaku employs over 1,400 people in the manufacturing and support of its analytical equipment, which is used in more than 90 countries around the world supporting research, development, and quality assurance activities. Throughout the world, Rigaku continuously promotes partnerships, dialog, and innovation within the global scientific and industrial communities.
