ExchangeTek Partners with Trusted Data Solutions to Further Archive Migration Services

TDS Adds Long-time Veritas Partner to TrustedPartner Program

New York, NY – (March 19, 2019) – Trusted Data Solutions (TDS), the global leader in legacy data management and transformation, today announced a new partnership with ExchangeTek, a Veritas Partner that prides itself in the strategic implementation of archiving, e-discovery and DLP projects. With the addition of TDS' Evolve email migration solutions and services, ExchangeTek will be able to drastically increase the number of sources and destinations they can migrate to and from.

"Our business is deeply rooted in making sure Veritas clients can easily migrate to their latest platforms with confidence," said Richard Ghastin, president of ExchangeTek. "By adding TDS Evolve and RAP to our solutions portfolio, we can further extend our migration services to many more sources and destinations, as well as offer clients a compliant solution for their tape backups advancing our entire legacy data capability."

Due to their depth in experience working with Enterprise Vault and archive migrations, for years enterprise customers often look to ExchangeTek to migrate their legacy email archives to Veritas EV, upgrade between different versions of EV, restructure existing EV archives, as well as move on-premise EV archives into the cloud. Via this partnership with TDS, ExchangeTek will be enabled to increase their services beyond EV to over thirty-percent more archive migration sources and destinations – as well as to introduce a path for their customers' legacy tape backups. The TDS Restoration Assurance Program (RAP) – which catalogs, stores and retrieves data on demand – offers customers the ability to move to the cloud more efficiently and cost effectively.

“I’ve had the pleasure of working with Richard and his team in the past and have a tremendous amount of respect for the archive migration knowledge and expertise,” said Marcella P. Arthur, global vice president, marketing and channel operations at TDS. “Having them join our TrustedPartner Program and integrate our solutions into their portfolio of services is a boom for our business – they lead with service excellence and achieving complete client satisfaction.”

About Trusted Data Solutions

For more than two decades, Trusted Data Solutions (TDS), the foremost expert in legacy data management, has set the standard for compliant access, management and transformation of voice and other electronic data. Their leadership in backup tape restoration, email archive migration, and voice logging retrieval and restoration services, coupled with their recent Voice Compliance Practice advancements, makes them a one-stop-shop for organizations requiring an all-inclusive voice managed service. TDS is the preferred choice for corporations, regulated institutions, eDiscovery specialists, government agencies and law firms that require compliant data transformation. Their industry leadership is demonstrable in their commitment to advancing their services and operations to support the demands of their growing, global customers and partners.

With its North America Headquarters in New York City, and two international headquarters in the United Kingdom and Singapore, TDS maintains one of the most expansive global restoration assurance facility footprints in the market. Facilities are based in New York, New Jersey, California, Canada, England, Wales, Germany, the Netherlands, Norway, Switzerland, Australia, Hong Kong and Singapore. Millions of customer tapes are under TDS management, equating to over 500 petabytes of data, and TDS has successfully delivered over 37 thousand projects.

TDS is a wholly owned subsidiary of TDS Global Holdings which is privately held.

About ExchangeTek

ExchangeTek, a Veritas Partner, was founded in 2003 for the purpose of providing highly focused design and implementation expertise for archiving, e-discovery and DLP projects.

As a legacy KVS Consulting Partner, ExchangeTek was well-prepared to deliver enterprise-class design and implementation services, after the acquisition by Symantec/Veritas, for their Messaging Management platform. This platform is anchored by the market-leading Enterprise Vault product suite.
