## **Plastatech® Engineering, Ltd. Unveils New Line of Prefabricated Accessories**

**SAGINAW, MICHIGAN** – March 2019 – Plastatech Engineering is pleased to announce the launch of their new line of prefabricated accessories, featuring product styles such as a straight pipe boot, angled pipe boot, inside corner, outside corner, and other customizable options. Designed to provide time-saving solutions for a variety of geomembrane projects, accessories are available in polyvinyl chloride (PVC), high-density polyethylene (HDPE), reinforced polyethylene (RPE), linear low-density polyethylene (LLDPE), reinforced polypropylene (RPP), and thermoplastic olefin (TPO).

“This new accessory line compliments Plastatech’s long standing commitment to push the manufacturing process beyond the ordinary,” said Shawn Sny, Executive Vice President. “We’re excited to offer our customers a product that allows for faster installation times while simultaneously lowering the risk of leaks or failures.”

Plastatech’s prefabricated accessories are manufactured in our quality-controlled factory conditions and are customizable to meet the needs of a variety of installation challenges. For detailed information on the complete line of Plastatech prefabricated accessories, or to request a sample or quote for your future project, visit [www.plastatech.com](http://www.plastatech.com) or call 800-892-9358.

### **About Plastatech® Engineering, Ltd.**

Plastatech produces calendared and extruded PVC films, weft-inserted textiles, single-ply PVC roofing membrane, reinforced and non-reinforced geomembranes, and laminated vinyl fabrics that are used for tension structures, temporary shelters, agricultural storage, pond liners, and other applications. Plastatech is headquartered in Saginaw, Michigan. For more information on Plastatech, call 800-892-9358 or visit [www.plastatech.com](http://www.plastatech.com).
