

# 3D Mobile Volume Dimensioning

Take Your Productivity to Another Dimension!

## Maximize Your Profits

Mobility is key.

Eliminate the time and manpower needed to move boxes to take measurements. With xDIM Mobile you can now take the rugged tablet you carry every day and simply calculate volume dimensions in its current location. It's the perfect solution for the transportation, supply chain management, logistics, shipping and warehouse industries.

Empty space is lost revenue.

Save money on the purchase of an expensive, stationary dimensioning system. Now, for a fraction of the cost you can arm your workforce with MobileDemand's Rugged xTablets, geared with Intel® RealSense™ Depth Camera D415 and xDIM's cutting edge Mobile Dimensioning software.

- Optimize staging efforts
- Maximize space
- Speed up processes
- Reduce chargebacks
- Increase Revenue

xDIM™ Mobile is a registered trademark of 4DMobile, LLC. Patent No. 10,268,892 [www.ruggedtabletpc.com/patents](http://www.ruggedtabletpc.com/patents)

## Key Advantages:

**Measure Packages  
Wherever they are**

**Improve Space and  
Time Efficiencies**

**Increase Revenue  
while Reducing Costs**

**Enable Operational &  
Performance Insights**

- Get quick and accurate measurements of any packaging
- Simply scan with the tablet you carry every day
- Eliminate the need to move bulky and heavy boxes

- Determine stackability and fill every square foot of shipping trucks
- Optimize warehouse space
- Speed up processes

- Increase revenue by charging by volumetric weight
- Reduce shipping chargebacks
- Reduce volume dimension scanning investment costs

- Capture data immediately
- See results in real time from a cloud-based analytics dashboard
- Easily collaborate with Value Chain Partners
