

For Immediate Release

Radiant Vision Systems Announces New Office Location in Novi, Michigan

REDMOND, Wash. – April 17, 2019 —

Radiant Vision Systems, a leading provider of visual test and measurement solutions for lighting and displays, announces that it has opened an office in Novi, Michigan, U.S.A. The facility is located in Metro Detroit,

recognized as the hub of automotive design, manufacturing and innovation in North America. This location allows Radiant to provide local support to its growing automotive customer base, with direct resources to enable measurement solutions development for displays, lighting, head-up displays (HUD), and a range of automated visual inspection applications.

“In order to support the growth of our customers in Michigan and surrounding areas, Radiant must in turn expand our network of resources,” says Radiant Executive Vice President and Chief Solutions Officer Doug Kreysar. “The decision to open an office location in Novi was a logical next step for Radiant. Evidenced by trends in advanced lighting, display-based HMI, and sensing systems in today’s vehicles, there is a growing need for solutions providers in the world’s automotive centers to facilitate quality goals for light-emitting systems. With the opening of our Novi office, we are now able to offer local customers in automotive and other industries more immediate and personal service. Additionally, the Novi facility gives us the opportunity to increase our engineering footprint to continue development across all automated visual inspection applications, including light & color measurement, visual surface inspection, and assembly verification.”

Radiant’s Michigan facility will support local engineering and sales teams, with labs for solutions engineering and customer demonstrations. The Radiant Michigan team will focus on development of its [Advanced Vision](#) suite (including software and fixtures for assembly verification, surface inspection, and particle inspection) as well as [automotive](#) display and light test systems.

The Radiant Michigan office is located at:

41700 Gardenbrook Road, Suite 145
Novi, MI 48375 USA

Radiant offices in the U.S.A. include the company’s global headquarters in Redmond, Washington, and a sales and support office in Cupertino, California. For more information about Radiant and to view global office locations, visit www.RadiantVisionSystems.com.

About Radiant Vision Systems

Radiant Vision Systems works with world-class brands and manufacturers to deliver creative visual inspection solutions that improve quality, reduce costs, and increase customer satisfaction. Radiant's legacy of technology innovation in photometric imaging and worldwide install base date back more than 25 years and address applications from consumer electronics to automotive manufacturing. Radiant Vision Systems product lines include TrueTest™ automated visual inspection software for quality control, and ProMetric® imaging colorimeters, photometers, and light source measurement systems. Radiant is headquartered in Redmond, Washington, USA, with strategic offices in California, Michigan, China, and South Korea. Radiant has been a part of Konica Minolta's Sensing Business Unit since August 2015. For more information, visit www.RadiantVisionSystems.com.
