Portable LED Baby Night Light

The SecurityMan for Kids portable LED night light is an ideal table lamp for baby's room because it provides a warm or cool light perfect for a quick diaper change, midnight bottle feeding or just a little extra sense of security for nervous kids to help to shush away the "monster in the closet". The light is cool to the touch so it's easy to press down on the bulb to adjust the dimmable LED to suit your needs, or to take the bulb out of the charging cradle for a trip to the bathroom or kitchen. The clickable on/off button on the bottom of the stand alone MBABYLIGHT lets you adjust brightness even when the bulb is away from its base. Never buy batteries, it's rechargeable! The wireless smart charging dock's anti-skid base can be plugged into any USB port and will keep the bulb charged to use in any room of your home, garage, RV or dorm room. In the event of a blackout, the MBABYLIGHT will work as an emergency light and automatically turn on. With so many uses, the MBABYLIGHT is a perfect addition to every home.

Features

• 2 LED color options (cool and warm white)

• Press-n-hold control: Press and hold the bottom button to control dimness and switch between LED color options

• 650 mAh Li-battery; Up to 8 hours at the highest brightness and 28 hours at the dimmest when fully charged

• Easily adjusts between White and warm White

• Smart wireless charging base

• Light automatically turns on during a power outage

• Can be used as a handheld light
