FOR IMMEDIATE RELEASE

THE NEW EXPERTS IN LARGE KITCHEN APPLIANCES AND KITCHEN DESIGN

May 1, Reno, Nev. – At [Appliance Educator](#) we are building our brand as the expert source on large kitchen appliances and kitchen suite design. Our YouTube channel is the place for video content showcasing product review & comparisons, design trends for your kitchen suite, DIY's & How-to informational videos, and much more.

The Appliance Educator team sees the kitchen as the heart of the home, the center piece when entertaining, and for many of us where we spend our mornings, nights and weekends when not in the office or out on an adventure. Simply put, we love the kitchen! We can't wait to share our enthusiasm, information, and sense of humor with likeminded kitchen fans across the web.

It doesn't stop with affection. Our excitement only means so much on its own, which is why we are seeking to share that excitement with others and looking to partner with major appliance brands and content creators to help us bring our zeal for kitchen appeal to an even larger audience.

We know homeowner's have enough stress as is, so we are taking some weight off their shoulders by doing the homework for them and bringing our research to one convenient location for cutting edge designs, product reviews, and how-to-videos.

"Appliance Educator has become a trusted source for my husband and I as we transform the kitchen of our first home into our dream kitchen." Said one of our [YouTube](#) subscribers.

With being the single, trusted source for the best information in kitchen space, we aim to foster a homey, loving kitchen space for all to enjoy through fun, informative content in bite-sized bits and clear, cogent walkthroughs of projects. Friendly, simple fun perfect for the expert and first timers alike.
