

Navigate Your Spend

SpendHQ provides the enterprise-level spend visibility you need to improve sourcing effectiveness, manage compliance, and make confident management decisions.

Spend Visibility

Identify sourcing opportunities and drill down into the details to get real insight. Simple point-and-click navigation helps you identify areas of noncompliance and immediately visualize your impact. Use the SpendHQ proprietary Power Filter to slice and dice your data the way you want to see it. No expertise required.

Contract Visibility

Obtain clear and actionable insight into your vendor contracts and agreements to maximize your strategic sourcing leverage and create measurable savings. Explore your contracts collectively and individually. Sort them by contract value, effective dates, document types, and other attributes. Store and track contracts in association with specific vendors or spend categories.

Category Management

Analyze major sourcing categories at an in-depth level to monitor compliance and pricing accuracy. Empower your procurement professionals with instant access to the information they need to uncover maverick spend by strategic category. Review your category spend and analyze it in greater detail by viewing comprehensive cross sections.

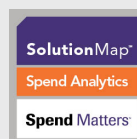

Vendor Information Management

Access highly detailed and current supplier information powered by InsideView APIs. View vendor financial information, explore vendors' competitors to identify potential candidates for sourcing opportunities, learn about vendor parent child relationships to create sourcing leverage, and much more.

SpendHQ is a spend analysis solution that provides rapid, accurate and detailed visibility into enterprise spend data. This full-service SaaS (Software-as-a-Service) spend analytics solution delivers actionable insight for sourcing and procurement professionals. With SpendHQ as your command center, you give procurement leaders inside your organization the power to impact the bottom line.

RECOGNIZED BY

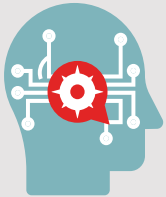

The SpendHQ Process

A SaaS Solution Combined with Data Optimization Services

CONSOLIDATION, NORMALIZATION, AND CUSTOM CATEGORIZATION OF SPEND DATA

It couldn't be any simpler. SpendHQ takes all your messy, raw spend data through our market-leading spend data optimization process to ensure a minimum target of 98% spend categorization. Based on our 15+ year history of enabling spend visibility for leading companies, our innovative data approach incorporates machine learning and algorithm-based analytics built upon the \$1.5T in spend and 8.5MM unique vendor records we've categorized over the years. Backed by the procurement and sourcing expertise of Insight Sourcing Group, SpendHQ is the only spend analytics technology provider that can inject deep expertise into the data optimization process.

HUMANWARE™ COMPONENT

It is our belief that spend analysis cannot be fully automated, and to ensure a high level of accuracy a solution requires 'Humanware' to perform the necessary pick-and-shovel work. In addition to our innovations in advanced data strategies & machine learning, SpendHQ procurement experts also perform the necessary "human logic" with resources based in North America to ensure your data is truly categorized from a strategic sourcing perspective.

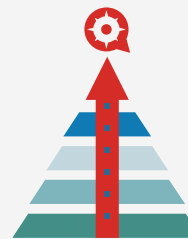

PROCUREMENT PARTNERSHIP

As part of the initial deployment and on-going refresh cycle, SpendHQ's sourcing experts work with your team to develop a custom spend taxonomy that reflects a true "sourcing-level" category structure. While companies commonly struggle with having to interpret GL or UNSPSC codes that do not reflect a sourcing perspective, SpendHQ's experts will help develop and maintain a "spend cube" that matches your organization's unique needs.

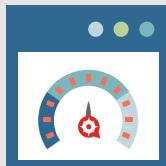

SPEND VISIBILITY

View your entire organizational spend with one click-it's that simple. Through our simple and easy-to-use interface, instantly identify untapped saving opportunities and create custom reports with multiple layers of analytics to view your spend the way you need to see it.

POST-SOURCING ANALYTICS

SpendHQ is the only spend analytics provider that focuses on managing categories after sourcing. With our Category Management and Compliance modules, you can continue to ensure pricing accuracy, eliminate rogue spend, and ensure promised savings are met.

SAVINGS ROADMAP

Injecting the sourcing expertise of Insight Sourcing Group, SpendHQ helps to build a savings roadmap, identifying sourcing and cost-optimization strategies. Go beyond your own data and receive sourcing expert insights to drive a massive ROI.
