## **Envirosight Releases Guide to Emergency Response Planning for Wastewater Operators**

*Free resource provides tips for developing a plan, identifying vulnerabilities and incorporating resilience into operations.*

Randolph, NJ—May 1, 2019—Envirosight, a market leader in underground pipe inspection equipment, released its guide to Emergency Response and Disaster Planning for Wastewater Operators. This resource educates wastewater personnel on the value of an emergency response plan and provides guidance on creating one.

Water and wastewater systems are a vital piece of civil infrastructure, yet they are also uniquely vulnerable to disasters, both natural and man-made. Aging components are spread across a wide geographic area and are often underground, so access requires expertise under the best conditions. In a crisis, maintaining a minimum of functionality can be a challenge. Many cities and states have regional emergency plans, but these strategies may overlook the nuances of wastewater management. An emergency response plan for wastewater operators should be applicable during any disaster, from minor equipment vandalism to a major earthquake that results in system-wide failures.

“Preparing for the worst improves response time and reduces confusion across the entire system. And by combining a strategic response plan with ongoing inspection and maintenance, wastewater operators can help protect their assets and their communities,” says Richard Lindner, president of EnviroSight. “Our new guide, Emergency Response and Disaster Planning for Wastewater Operators, can help municipalities and sewer districts fulfill that mission.”

A copy of this free guide is available at [inbound.envirosight.com/emergency-response-planning-for-wastewater-operators](http://inbound.envirosight.com/emergency-response-planning-for-wastewater-operators). Emergency Response and Disaster Planning for Wastewater Operators was created as part of EnviroSight’s commitment to producing and sharing resources for the wastewater industry.

### **About EnviroSight LLC**

Randolph, New Jersey-based EnviroSight, LLC provides sewer cameras and other pipeline inspection solutions to municipalities, contractors, departments of transportation, and civil/environmental engineers. EnviroSight is a full-service manufacturer of robotic sewer inspection crawlers, zoom cameras, push cameras, inspection reporting and asset management software, and inspection vehicles. EnviroSight is committed to ongoing innovation, delivering products that enhance user productivity and inspection detail. EnviroSight serves customers through a trained network of regional sales partners who deliver localized support and expertise with rapid turnaround. All EnviroSight technical employees hold NASSCO PACP certification. Visit EnviroSight online at [www.envirosight.com](http://www.envirosight.com)
