

WATERFIELD ENERGY CONTINUES RAPID UPSTREAM SOFTWARE MARKET EXPANSION

One of the world's largest chemical and energy companies has selected Waterfield's upstream product to scale oil and gas operations

TULSA— June 27, 2019 — Waterfield Energy, a leading provider of advanced oil and gas software, has added a large chemical and energy company as an Upstream client. The client is a public oil and gas company focused on rapidly expanding into the oil and gas industry.

“As we started to look at the upstream software solutions in the market, we quickly determined that Waterfield's upstream product has the most relevant and advanced software capabilities to support a rapidly expanding organization like ours,” says the Financial Analyst.

“Our upstream software was developed with input from our customers enabling us to deliver upstream ERP accounting solutions to meet today's demands of the oil and gas industry, said Pete Waldroop, CEO of Waterfield Energy. “The market reaction to our upstream product has exceeded our expansion plans and enabled us to meet the needs of the largest oil and gas organizations.”

“The objective for this client was to select a software solution that could support the company's rapid scaling of operations, they were confident in Waterfield's platform,” said Tracey Radi, Director of business development of Waterfield. They quickly evaluated and selected key Upstream product.”
