

FOR IMMEDIATE RELEASE

3 Ways of Improving Profit Margins on Kraken Futures with Trade Automation

Qualified traders who use Kraken Futures and the HaasBot now have the ability to fully automate cryptocurrency futures trading strategies based on technical indicators, safeties, and insurances.

July 10, 2019, Rotterdam, Netherlands - [HaasOnline](#), the oldest and most trusted automated trading platforms, today officially announced the integration of Kraken Futures, formerly known as Crypto Facilities. This potent combination of cryptocurrency trade automation and futures trading with up to 50x leverage on Kraken Futures allows qualified traders the freedom to trade at all hours of the day with the ability to adapt to market movements in real-time.

- Use less capital to open positions with futures than with spot or margin trading
- Mitigate losses by shorting future positions on several cryptocurrencies automatically
- Speculate on crypto markets with leverage and more efficiently with automation

HaasOnline's inclusion of various digital asset platforms, that allow qualified traders access to leveraged futures and options trading, has received high levels of support from the trading community. This greatly improves exposure to traditional investors who want to explore the growing possibility of investing and trading with cryptocurrencies.

Stephan de Haas, HaasOnline CEO, said: "The benefits that leveraged futures will bring to the cryptocurrency ecosystem are undeniable. We've been following the acquisition closely and knew we wanted to be able to provide our traders access to the best opportunities."

Their latest exchange integration follows hot on the heels of another recent exchange integration, [Deribit](#), which is a competing digital asset platform that also allows cryptocurrency futures and options trading with up to 100x leverage.

Full Risk Disclosure

Cryptocurrency, forex, futures, and stocks contain substantial risk and are not for every investor. An investor could potentially lose all or more than the initial investment. Risk capital is money that can be lost without jeopardizing one's financial security or lifestyle. Only risk capital should be used for trading and only those with sufficient risk capital should consider trading. Past performance is not necessarily indicative of future results.
