

Are you ready...

To take the guesswork out of your social media marketing?

To build brand recognition, customer loyalty and engage with a broader audience?

To save time, money and build beautiful social media marketing campaigns in minutes that could last for weeks or months at a time?

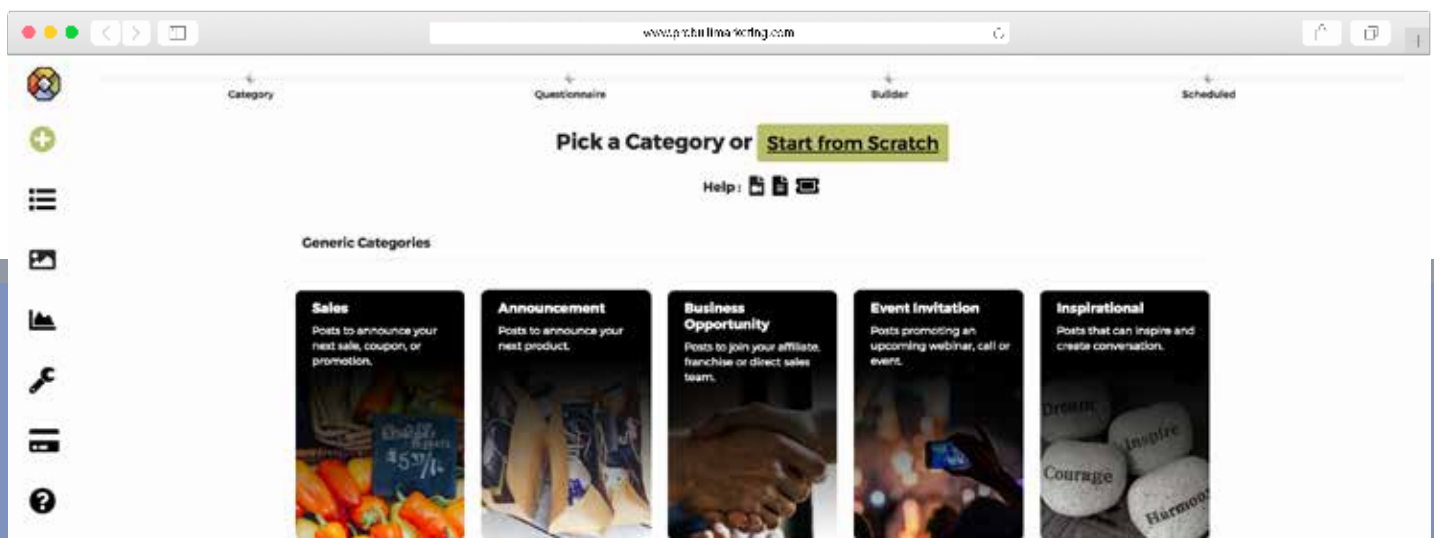

Well... Have you thought about **hiring AIMI?**

Hi, **I am AIMI**, the Artificial Intelligence Marketing Interface.

I am the first Social Media Marketing Artificial Intelligence (AI) that writes your content, builds campaigns for you and analyzes the results.

Here are just a few of the **amazing features I provide:**

- AI content & campaign creation.
- Recommendation engine for the best times and days to post powered by machine learning.
- AI that continues to analyze the live results and get's smarter in how it constructs the content and strategies that will work best for your audience.
- Social media management and scheduler tool.
- Image library with over 11,000 royalty free stock photos to use for your campaigns.
- A drag-and-drop designer that allows you to design consistently stunning social media post graphics.

So you may be asking how do I compare to **the competition?**

Do it yourself solutions like Buffer, Hootsuite, and Sprout Social range from \$10 to over \$100 per month. These solutions are scheduling tools that give you a blank canvas and require you to create the content and campaign settings from scratch. They don't include AI content creation or machine learning to do these tasks for you.

Solutions managed for you like Main Street Hub, Marketing360, or hiring writers and social media experts can range from \$250 to well over \$1000 per month. These solutions will only write and post a certain amount of content per month. They may require year-long contracts. Getting a social campaign is not on demand with solutions like these as they require meetings, approval processes and working within someone's schedule.

For \$127 per month I am like having a full-time social media marketing expert on staff monitoring your results 24-7 and making the adjustments you need for maximum success!

I can save you 8 to 10 hrs per week and take the guesswork out of building your social media campaigns so you can consistently post to effectively reach the over 3.2 billion social media users online today.

If you haven't given much thought to your social media marketing strategy, now is the best time to put me to work for you!
