Envirosight Releases Guide to Best Practices for Outsourcing Sewer Maintenance

Free resource explores both outsourcing and keeping sewer management tasks in house.

Randolph, NJ—July 16, 2019— Envirosight, a market-leading provider of municipal sewer inspection equipment, released a new white paper that discusses the advantages and challenges that come with both completing sewer maintenance in-house and outsourcing the work.

Maintaining a sewer system requires a great number of resources, including personnel, equipment, time and money. *In-house or Out: Deciding When to Outsource Collection System Maintenance* provides an in-depth breakdown of the options, as well as a flowchart to guide system operators considering their capabilities before making a potentially costly decision.

With increased attention on the funding of infrastructure projects in recent years—allowing wastewater departments to prioritize inspection and repair—comes more responsibility to utilize funds wisely. Budget, safety, efficiency and length of project are some of the common factors that the guide evaluates.

“There is no simple answer to deciding between completing maintenance in-house or outsourcing work,” says Richard Lindner, president and CEO of Envirosight. “Every city and every project is unique, and operators need to be informed about the differences of each option. But being proactive about the work while remaining within budget is essential to maintaining an efficient and effective collection system.”

About Envirosight

Randolph, New Jersey-based Envirosight provides sewer cameras and other pipeline inspection solutions to municipalities, contractors, departments of transportation, and civil/environmental engineers. Envirosight is a full-service manufacturer of robotic sewer inspection crawlers, zoom cameras, push cameras, inspection reporting and asset management software, and inspection vehicles. Envirosight is committed to ongoing innovation, delivering products that enhance user productivity and inspection detail. Envirosight serves customers through a trained network of regional sales partners who deliver localized support and expertise with rapid turnaround. All Envirosight technical employees hold NASSCO PACP certification. Visit Envirosight online at www.envirosight.com
