SIG University Opens Enrollment for Sourcing, Supply Chain and Risk Management Certifications

Students can continue their professional responsibilities while earning an internationally recognized industry credential.

Jacksonville, Fl. (23 July 2019) – SIG University, an online certification program focused on strategic sourcing, supply chain governance, and third-party risk management today announces that enrollment is open for courses beginning on September 30.

SIG University fills an educational training gap in today's sourcing, supply chain and risk management workforce. SIG University educates professionals who work at Fortune 500 and Global 1000 companies, with over 1,000 graduates from over 200 companies representing 17 countries. Upon graduation, SIG University students earn a credential as a Certified Sourcing Professional (CSP), Certified Third Party Risk Management Professional (C3PRMP) or a Certified Supply Management Professional (CSMP).

The CSP course is administered over a 12-week period, the C3PRMP course is an eight-week program and the CSMP is a more condensed program that takes five weeks to complete. Each of the three certifications is valid for five years and is delivered in a modular format with lessons, assessments and quizzes to test mastery of subject matter. In addition, SIG University students have access to one of the largest banks of available sourcing data in the U.S. through the SIG Resource Center, which houses over 5,000 tools, templates, methodologies, processes, whitepapers and archived presentations.

"The status quo is no longer acceptable. Today's sourcing, supply chain and risk management professionals need to have a clear understanding of how the industry is evolving so they can be confident in their decision-making capabilities and quickly implement best practices in their organizations," said Dawn Tiura, SIG University CEO and President. "It is more important than ever for tomorrow's leaders to embrace digital transformation and the risks and benefits that come along with it. SIG University's certification courses equip students to meet their organization's evolving challenges."

SIG University is currently enrolling students for classes that begin on September 30. Closed cohorts are available outside this date for companies enrolling 25 or more students simultaneously. Discounts are available for students and/or companies who enroll before September 3. To learn more, visit our website.

About SIG University

SIG University is the premier training and certification program for sourcing and outsourcing professionals looking to enhance their practical experience with the latest sourcing thought leadership. SIG University was founded on the ideals of elevating the sourcing profession to deliver strategic value to the corporation, and is the only sourcing and governance certification designed and delivered by seasoned sourcing practitioners.

About SIG

SIG, https://sig.org/ is a membership organization that provides thought leadership and networking opportunities to executives in sourcing, procurement and outsourcing from Fortune 500 and Global 1000 companies and the advisors who serve them. SIG is widely known as a forum for sharing "next" practices and thought leadership through live networking events, virtual forums and a comprehensive online SIG resource center (SRC), which was developed by and for professionals in sourcing and outsourcing. The organization is unique in that it blends practitioners, service providers and advisory firms in a non-commercial environment. SIG is also the parent organization for SIG University, a one-of-a-kind certification and training program for professionals and executives seeking deep expertise in sourcing and governance for themselves or their teams, as well as Future of Sourcing, which provides unrivaled digital content for the opinion-formers and decision-makers at the heart of the outsourcing space.
