CLEANEARTH™
RECYCLING & DISPOSAL SOLUTIONS

IT Asset Management & Disposition Solutions

CLIENT IT ASSET MANAGEMENT

- All devices are accounted for on-site prior to demanufacturing
- Materials are received, screened, and sorted at Clean Earth controlled processing facilities nationwide
- Assets are entered into our inventory management system by manufacturer make, model, serial number, and client asset tag number, if applicable
- Each asset is assigned a unique Traveler ID barcode sticker

DIAGNOSTICS & REFURBISHMENT

- Assets are tested to key functions in accordance with R2 standards
- Any client data present is expunged when applicable
- Equipment is refurbished to enhance the value of working equipment

CERTIFIED DATA SECURITY, REPORTING & DESTRUCTION, NAID

- Assets are sanitized to NIST and DoD data erasure standards
- Equipment is tracked from receipt to final disposition by multiple data points with unbroken chain-of-custody
- Certificates of destruction are provided for all certified destruction jobs

REVERSE LOGISTICS & REDEPLOYMENT

- Finished goods tested to key functions in accordance with R2 standards are inventoried and stored in a clean and secure, video-surveillance monitored environment until picked, cleaned, packaged, and shipped
- Storage, reverse logistics, and redeployment services can be tailored to fit each client's unique needs

IT ASSET RE-MARKETING, IT ASSET MANAGEMENT & DISPOSITION

- Refurbished client assets tested to key functions in accordance with R2 standards are made available for sale and then sold via secondary markets to recover maximum value
- Untapped revenue is realized
- Scrap or untested material is sold to approved downstreams
- Asset management costs for clients can be offset with remarketing of refurbished assets

REPORTING

- A full audit report is available to clients upon request

Why Choose Clean Earth?

TRUSTED
As leaders in the recycling and disposal industry, we are trusted by many Financial, Healthcare, Educational, and Government organizations to protect and manage their Data, Universal Wastes, and Hazardous Wastes.

TRANSPARENT
Extensive documentation is provided to showcase the chain-of-custody from receipt of materials to recycling and disposal.

SAFE & SECURE
Our secure process removes all data to eliminate any security breaches.

COST EFFECTIVE
We maximize the resale potential of your equipment to restore its value.

CERTIFIED
All Clean Earth electronics facilities are R2/RIOS certified, fully permitted, and compliant with all Local, State, Federal EPA, OSHA, and DOT regulations.

FINANCIALLY STABLE
Clean Earth is one of the largest specialty waste companies in the United States.
