CESSNA CITATION BRAVO

DESERTJET

THE UTMOST IN CABIN COMFORT, LUXURY AND VERSATILITY.

The Citation Bravo was the last incarnation of the very successful Citation II, with upgraded landing gear and avionics and new quieter engines that brought an increase in performance, range and fuel economy.

Capacity	7+1
Year of Manufacture	2004
Year of Refurbishment	In: 2014 Ex: 2014
WIFI	N
Cabin Length (feet)	15.8
Cabin Width (feet)	4.8
Cabin Height (feet)	4.8
Baggage Capacity (Cu. feet)	73

The center club seating arrangement is appointed with a fold-down executive table. Sliding doors conceal a private lavatory that includes belted seating for an additional eighth passenger. Passenger seats recline, swivel 180 degrees and track laterally inboard, forward and aft for additional head and shoulder room. Exceptional short-field capabilities and seating for eight make the Citation Bravo an extremely versatile aircraft. With more than 603 aircraft produced when production ceased in 1994, the venerable Citation II was much in need of a technological overhaul.

In came the Citation Bravo. After receiving FAA certification in the summer of 1996, the Citation Bravo quickly made a name for itself in the light jet aircraft industry. Equipped with more efficient Pratt and Whitney PW530 engines, a trailing link landing gear system utilized for smoother landings, and the latest Honeywell avionics package for added safety, the Citation Bravo is one of a kind.
