

About Us

Doing Good Works was born to meet a need for sustainable social change in underserved foster youth communities.

In 2014, Scott Henderson & Jordan Bartlett became aware of some harsh realities surrounding the foster youth population:

- 1) There are 400,000+ kids in foster care everyday in the United States.
- 2) On average, 50% of these youth will become homeless or incarcerated after aging out of the system.

Both coming from corporate backgrounds, Jordan and Scott envisioned a business model where their areas of professional expertise could fuel their mission to help this overlooked population, and so Doing Good Works, a public benefit corporation, came to be. Today, we operate a full-service print, promotional merchandise, and packaging company in the heart of Orange County, CA, and have been able to impact over 780 individuals to date. Our commitment to social and environmental sustainability coupled with our dedication to customer service has earned us business from notable clientele, and a reputation for being the best in our industry.

Our culture of caring goes deep within our organization, as we proudly feature a 10/20/30 business model in which we allocate 10% of profits to our core mission, strive to employ 20% of our staff from the foster youth community, and encourage employees to use 30% of their hours towards volunteer work of their choice.
