

Keep an Eye on the Road Intuitive, Reliable, & with Superior Support

CameraView™ is a plug-and-play solution that leverages your existing Cab-Mate solution to quickly and simply capture visual recordings to see critical events as they actually happened.

Drivers can choose to record on-command, or footage can be limited to event-triggered recordings, like on vehicular impact or airbag deployment.

CameraView™ Benefits

- Drivers Can Record at the Push of a Button
- Record Video on Critical Events
 - Hard Braking
 - Harsh Cornering
 - Heavy Acceleration
- Works Seamlessly with OneView for Full Operational Visibility
- No New Data Connection Needed
- Forward-Facing Only
- DVR Option to Pull Video (*on Request*)
- Simple and Quick Installation
- Cost-Effective

How It Works

Camera Specifications

Camera: Single Channel 1080p AHD CMOS

Video Compression: H.264

Video Resolution: Up to 1080p (1280px by 720px)

Video Frame Rate: NTSC (1 to 30 FPS configurable)

Angle of View: 110° Field of Vision

Wi-Fi: Built-In Wi-Fi Module & Antenna

Interface: 1 x USB 2.0 for Power Input

Operating Voltage: 8V to 36V DC

Operating Temperature Range: -20 °C to +70 °C

Size (Camera with Mount): 270.51 x 4.4 x 5.03 cm

Weight (Camera with Mount): 0.12kg

Standard Compliance: FCC, CE, RoHS
