# MANUFACTURING PROCESS

With years of experience, our industry-leading manufacturing process is second-to-none, ensuring the quality of your cards instantly impresses.

## 1 Chemical Etching

Upon artwork confirmation, your order will begin the chemical etching process to etch the desired shape, content, and cutout areas noted within your artwork.

## 3 Order Add-Ons

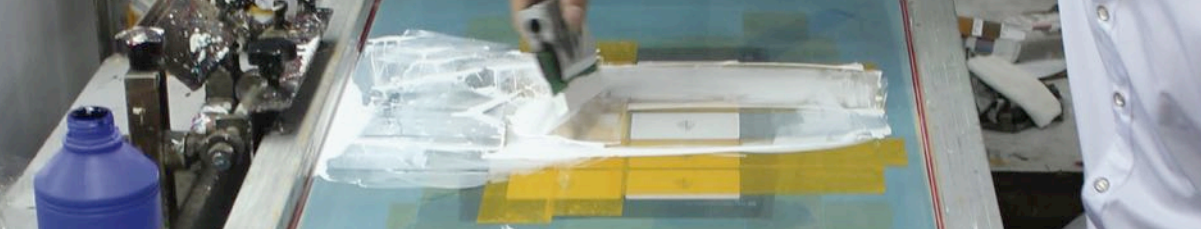

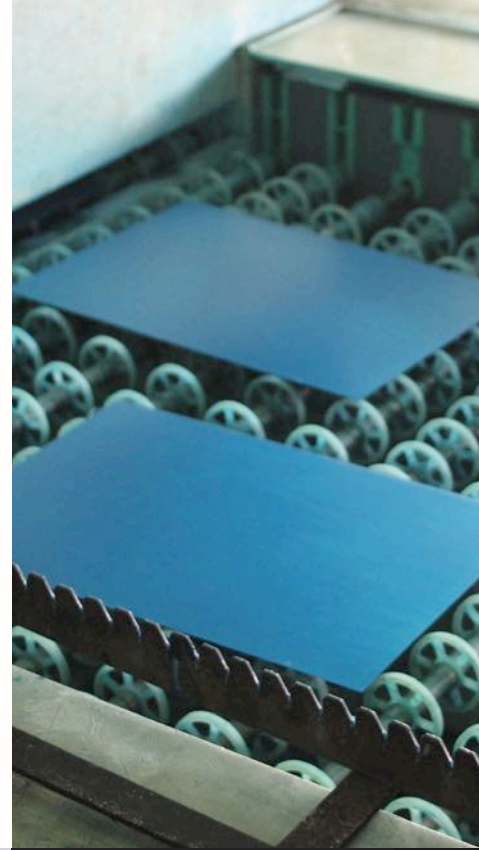

If any add-on's were purchased, each card will undergo additional processes to add features like variable information, magnetic stripes, and much more.

## 2 Screen Printing

If your design requires color, the screen printing process will begin by individually screening each specified color according to the design.

## 4 Quality Control

Numerous quality control checks are set to ensure consistency. The final cards are packed into individual clear sleeves for protection during shipping.
