NEW YORK, August 14, 2019 – *Inc.* magazine today revealed that Etica Inc. dba HIPAA Vault is No. 4328 on its annual Inc. 5000 list, the most prestigious ranking of the nation's fastest-growing private companies. The list represents a unique look at the most successful companies within the American economy's most dynamic segment—its independent small businesses. Microsoft, Dell, Domino's Pizza, Pandora, Timberland, LinkedIn, Yelp, Zillow, and many other well-known names gained their first national exposure as honorees on the Inc. 5000.

[HIPAA Vault](#) is a leading provider of HIPAA compliant cloud solutions, enabling healthcare providers, business organizations, and government agencies to secure their protected health information from data breaches, threats, and security vulnerabilities. At the core of HIPAA Vault's business is the managed solutions architecture that is included with every product and service.

“Many of our customers have migrated from the higher priced HIPAA hosting companies to us,” says Gil Vidals, CEO of [HIPAA Vault](#), “not only because we're extremely affordable, but because they actually receive more resources and better service than they previously had. For example, our 24x7x365 “tearless” support with less than 15 minute response times translates to a 90% first-call resolution for any customer issues. We've found that this tierless technical responsiveness, along with a 100% US-based support staff helps to facilitate strong relationships with each customer.”

Maintaining HIPAA compliance can be a challenge, Gil notes, and HIPAA Vault is also committed to helping companies understand their part in the process. For this reason, they offer a new, expanded product line designed to simplify HIPAA's complexities. "Whether it's cutting-edge, security awareness training for your staff, HIPAA compliant forms or faxing to improve patient experiences and promote office efficiencies, or even state-of-the-art database oversight to maintain HIPAA compliance, HIPAA Vault has the solution you need."
