**The Benefits of Contoura Reviewed as Beneficial for Women**  
**More and more patients are coming in for sessions because of the amazing response rate**

*Woodland Hills, California:* The reviews are in, ABM Medical Clinic's Contoura has become a big hit with amazing results for their patients. The high success rate for this non-invasive and pain free fat loss system, has patients booking their sessions before the summer ends.

The Contoura method which uses state of the art technology incorporating radio frequency and heat to rid fat in problem areas, takes about 10 minutes a week in six sessions that are spread out over time. Contoura has shown to improve skin elasticity, adding in new collagen making those stubborn areas smoother and silkier while stopping the growth of adipose tissue without any downtime. That means less fat, more sculpt!

Doctors Maryam and Mina take care of their patients, making sure that each person who comes in to see them will benefit from Contoura. Both doctors work closely with their patients, ensuring the precise results each person is seeking. Starting at \$400 with discounts available on packages, Contoura is the perfect gift for anyone.

Contoura can be done during a lunchbreak, that's how quickly it is done! For more information and to book your consultation call ABM (818) 222-8042.
