FINANCIALS

Financials built on SAP Business ByDesign

If fast, accurate financial management is your goal then you need In Cloud Express – Financials. It's a great value, speedy solution you can have up and running in a month. Streamline and automate your basic financial processes for as little as £140 a day. Benefit from a fully compliant financials package which **includes everything you need to run a successful company.**

Best of Breed Fast Financials

Enjoy anywhere, anytime access to your financial data with robust compliance features to put your mind at rest. Automate repeatable processes, provide stakeholders with accurate reports, save time and energy for strategic planning and staying competitive.

Grow your business with

- Improved Productivity
- Financial Transparency
- Faster Financial Close
- Embedded Real-time Analytics
- UK GAAP and IFRS compliant
- Insight & Control of processes

> "Their approach has always been customer first, always customer focussed, always about delivering projects on time and on budget and we see a lot of satisfied customers.
>
> John Meadows SAP

What's included?

Financial Management Accounting

Easily map your organisational hierarchy to support your legal, statutory and management reporting – make informed business decisions based on up-to-the-minute insights.

Cash & Liquidity Management

Meet cash flow deadlines quickly and efficiently. Get a transparent view of the company's liquidity position. Streamline your daily cash management cycle.

The system automatically collects and aggregates cash flow from payables, receivables and tax, as well as payment and liquidity management. Covers the whole cash flow management cycle from liquidity snapshot to forecasting. Optimize cash flow from money transfers or other cash flow impacting strategies.

Procurement

Strengthen your relationships with suppliers and improve your procurement processes to reduce costs – turning them into a competitive advantage. Identify and manage the best suppliers for materials and services. Gain insight into order management, supplier invoicing, and purchase requests.

Built-in Analytics

Analytics are a part of every process, delivering full transparency into every aspect of your operation and giving you the insights to make business-growing decisions. Keep track of performance from a single platform and monitor KPIs individually configured to your needs.
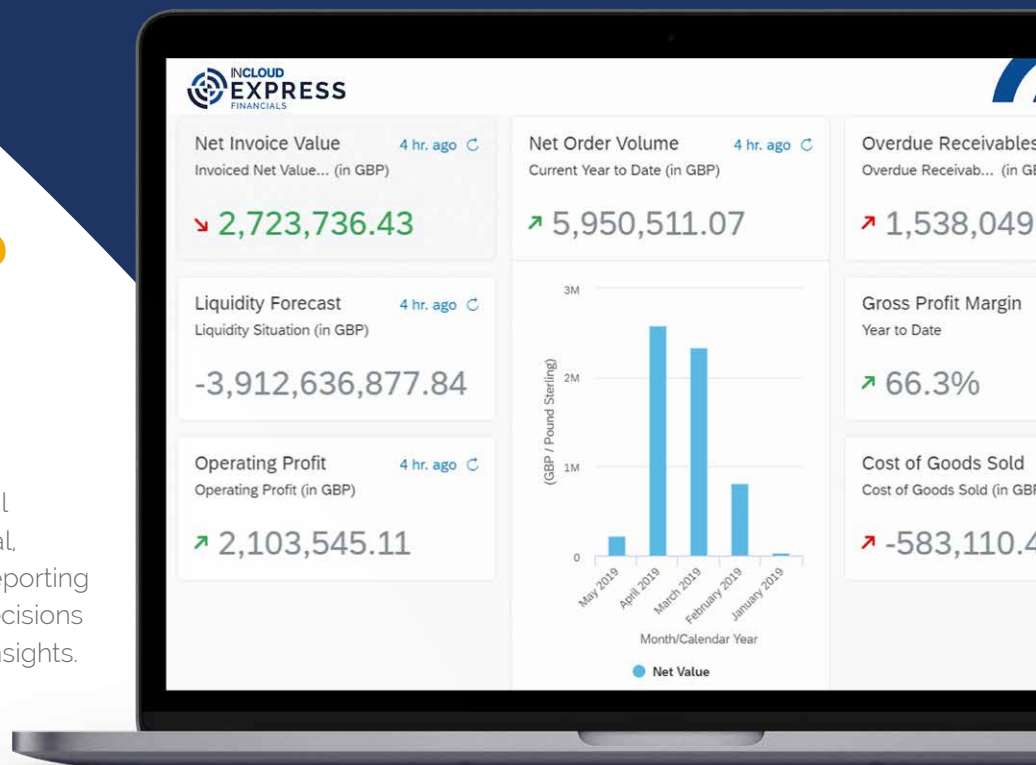

Compliance

Keep up-to-date and compliant with changing laws and regulations. The solution comes preconfigured for your company's accounting practices, applicable tax structures, and making tax digital. The system keeps you GDPR compliant. Frequent and automatic updates help ensure that your financial books and government reporting continue to meet regulatory standards, for example UK GAAP and IFRS. You get a transparent audit trail that records changes to company data from top-level aggregated figures to detailed postings.

Manage Customer Invoicing

Improve your cash flow by enhancing your customer billing process for goods and services. You have the flexibility to create invoicing documents individually, collectively, or as part of automatic invoice runs, which allows you to periodically process invoice requests due for invoicing. Benefit from embedded credit management for late payment management.
