

**iPatientCare is once again partnering with National Health IT (NHIT) Week 2019 which runs from September 23 - 27**

**iPatientCare stays committed to celebrate national health IT week and exhibits active participation in driving transformation of health and wellness ecosystem to promote better health outcomes and health equity.**

**Cincinnati, OH**, September 23, 2019 - iPatientCare, a pioneer in [cloud-based ambulatory EHR](#), revenue cycle management services, integrated practice management, and patient engagement solutions announces its participation as a proud partner in National Health IT week that will be celebrated from September 23 - 27, 2019.

This September 23-27, iPatientCare is a Proud Partner of [U.S. National Health IT Week](#). The annual week-long campaign focuses on supporting healthy communities across the U.S. through the application of information and technology solutions.

Comprehensive health care reform is not possible without system-wide adoption of health information technology, which improves the quality of healthcare delivery, increases patient safety, decreases medical errors, and strengthens the interaction between patients and healthcare providers.

Initiated in 2006 by the Healthcare Information and Management Systems Society (HIMSS), U.S. National Health IT Week has emerged as a landmark occasion for using health IT as part of the overall solution to improve America's healthcare as a bipartisan, federally led, market driven initiative.

The Week consists of events across the country, including U.S. National Health IT Week participants — market suppliers, provider organizations, payers, pharmaceutical/biotech companies, government agencies, industry/professional associations, research foundations, and consumer protection groups— all working together to elevate national attention to the advantages of advancing health IT.

“iPatientCare is pleased to be associated with National Health IT (NHIT) Week 2019 as a proud partner. As Healthcare IT leaders, we are continuously evolving innovative and disruptive information technology solutions to improve population health, enhance patient care, and reduce costs. Healthcare IT plays an evolutionary role in transforming patient care and we are proud to work towards that goal every day.” said [Vipul Patel, Senior Technology Officer, iPatientCare/AssureCare](#)

#### **About iPatientCare**

iPatientCare is a full suite of innovative healthcare products and value-added services that help physician offices, rural health clinics, and community/federally qualified health centers (CHC/FQHC) nationwide in improving the health of their patients, enhancing patient care through care management/coordination/analytics, and reducing costs of care delivery.

The awards-winning EHR, integrated practice solutions and value-added services, such as, the [revenue cycle enhancement](#) and quality improvement consulting, provide everything you need to control your practice operations, increase revenues, and provide better patient care.

iPatientCare helps healthcare providers to dramatically reduce A/R days and improve collections rates, reduce billing costs, eliminate the burden of repeatable, high volume work on their internal teams, and plug gaps in staffing and internal bandwidth. The revenue cycle teams are comprised of senior executives with extensive experience in clinically-driven revenue cycle management systems including certified billers and coders with managerial capabilities to facilitate client interactions, escalations and SLA.

The iPatientCare EHR - version 18.0, has received 2015 Edition ONC Health IT certification by Drummond Group, an Office of the National Coordinator-Authorized Certification Body (ONC-ACB), in accordance with the applicable eligible professional certification criteria adopted by the Secretary of Health and Human Services (HHS). Full certification details can be found at the [ONC Certified Health IT Product List](#).

As part of its MACRA-ready solutions, iPatientCare has been recognized as a qualified MACRA-MIPS registry by CMS, and has a distinguished credit of being selected as a preferred EHR and medical billing software by more than 70,000 users nationwide, numerous hospitals/health systems, federally funded regional extension centers, and in the past by the US Army and NASA Space Medicine.
