**CosMedical Technologies® Launches Cutting-Edge Sunscreen with Blue Light and Pollution Protection**  
*—Ultra Replenishing Sunscreen SPF 40 Now Available to Order—*

Davie, Florida (October 15, 2019)— CosMedical Technologies®, a leading dermatologist-founded global private label skincare provider, released today their Ultra Replenishing Sunscreen SPF 40, designed to shield skin from three major sources of environmental damage: UV light, blue light, and pollution.

Studies have shown that high energy visible (HEV) blue light and environmental pollution play a significant role in premature skin aging. According to recent findings, exposure to HEV light may cause even more short-term and long-term damage to the skin than ultraviolet light. Gina Stabile, CosMedical Technologies® Chief Executive Officer believes the time has come to rethink photoprotection.

“CosMedical is committed to offering medical-grade skincare solutions based on the very latest dermatological science, and the research is clear — in the fight against aging, UV protection just isn’t enough,” says Stabile. “We decided to create a sunscreen that goes beyond SPF.”

An update on the original Replenishing Sunscreen, the reformulated Ultra Replenishing Sunscreen SPF 40 now includes 8% zinc oxide, reef-safe UV-absorbers, and concentrated new actives to deliver enhanced photoprotection and anti-aging benefits. Chief among these is the strongest antioxidant on the market, Lipochroman®, with coverage against all three classes of free radicals. Withania somnifera extract, or White Cherry, offers natural protection against HEV light-related discoloration and dark spots. Firming peptides improve the appearance of lines, wrinkles, and loss of firmness.

Stabile states, “Light damage happens year-round, while pollutants and digitally-emitted blue light are practically everywhere, both indoors and out. Our new Ultra Replenishing keeps you protected through it all for visibly vibrant, younger-looking skin.”

Ultra Replenishing Sunscreen SPF 40 is available to existing customers through their designated CosMedical Technologies® account executive. New accounts may contact the CosMedical Technologies® sales team to place an order or make inquiries.

**About CosMedical Technologies®:** Founded in 1993 by board-certified dermatologist Loretta Ciraldo, M.D., FAAD, CosMedical Technologies® provides custom label skin care to licensed professionals around the world. A forerunner in the private-label skincare industry, CosMedical Technologies® is known for staying ahead of emerging industry trends, offering a wide range of dermatologist-developed formulas created with advanced ingredients and innovative technology.
