& Sports Medicine Specialists**

**Dr. Keith Jacobson Begins Term as President of the American
Board of Foot and Ankle Surgery (ABFAS)**

Rigorous Certification Standards Remain Top Priority

DENVER – Oct 15, 2019 – Advanced Orthopedics and Sports Medicine Specialists, a division of Orthopedic Centers of Colorado announced that [Dr. Keith Jacobson, DPM](#) was elected as president of the American Board of Foot and Ankle Surgery. Dr. Jacobson’s term runs until September of 2020.

In his role as president, he will advance the mission to protect and improve the health and welfare of the public by the advancement of the art and science of podiatric surgery.

“I’m honored to represent my peers – the best foot and ankle surgeons in the world – as president of ABFAS,” said Dr. Jacobson. “Ensuring that patients can select a qualified foot and ankle surgeon based on the rigorous ABFAS certification is critical to the integrity of our healthcare system, and I’m committed to ensuring that our certification represents the highest possible standard of care.”

ABFAS is the industry standard for qualified foot and ankle surgeons, and the organization works to promote lifelong learning and professional accountability, which are the board’s foundational principles for quality healthcare.

ABFAS certifies qualified foot and reconstructive rearfoot/ankle surgeons. Prior to receiving certification, candidates must become board-qualified in either foot surgery and/or reconstructive rearfoot/ankle surgery. ABFAS continues to review and improve the certification exams and uses a rigorous Case Review process combined with a didactic and computer-based patient simulation examination.

About Advanced Orthopedic & Sports Medicine Specialists

Advanced Orthopedic and Sports Medicine Specialists is widely recognized as the regional leader in comprehensive orthopedic services. The 19 physicians of Advanced Orthopedic and Sports Medicine Specialists have received specialized training in orthopedic surgery and in subspecialty areas within the field of orthopedic medicine. They diagnose and treat even the most complicated orthopedic conditions and are supported by a professional staff of physician assistants, medical assistants, x-ray technicians and administrative personnel at our two offices in Denver and Parker.
