

Dunn Solutions Successfully Achieves SOC 2 Type 2 Attestation Report

Chicago, IL, October 14, 2019 – Dunn Solutions, a digital commerce and business transformation consultancy focused on delivering velocity to its clients, announces that it has successfully completed its **Service Organization Control 2 (SOC 2) Type 2 Attestation Report** (commonly referred to as SOC 2 certification). The successfully completed attestation report required a thorough examination of Dunn Solutions’ operating computing environment conducted by the independent auditing firm NDNB Assurance LLP.

Dunn Solutions prides itself on providing its clients with the highest levels of data security and this achievement reinforces its dedication to remain on the forefront of security compliance. Dunn Solutions continues to work towards maintaining and strengthening the security standards as set by the SOC 2 Type 2 Report.

“We are pleased to have received this level of certification for our data security processes, it shows the importance we place on client data,” says **Bill Dunn, President, Dunn Solutions Group**

During the 2019 testing period, Dunn Solutions successfully obtained its SOC 2 Type 2 Report by participating in an attestation process to affirm its implementation and adherence of its secure operational controls.

The American Institute of Certified Public Accountants (AICPA)’s SOC 2 Attestation Report is considered the gold standard and is recognized as the most widely accepted attest standard for service providers worldwide.

"Dunn Solutions’ increased efforts towards compliance and monitoring activities will certainly elevate its operations towards higher levels of assurance to its clients in this world of ongoing security concerns. We have continued discussions with Dunn Solutions about elevating their oversight of the control environment and we appreciate their understanding of the value that can be taken from an on-going, applicable, and relevant compliance regimen,” as stated by Christopher Nickell, CPA, CITP, CFF, CRISC, of NDNB.
