

ObscurePI™, a key module of the 4iG Suite, focuses on identification and management of personally identifiable information – a key component of HIPAA, GDPR, CCPA, Sarbanes-Oxley, FISMA and other data privacy and compliance regulations.

Use ObscurePI with Relativity® to redact all of your privileged information and redefine your entire redaction workflow. It is a first of its kind offering on-demand redactions on all native file types eliminating the need to image documents in order to apply redactions.

SEARCH

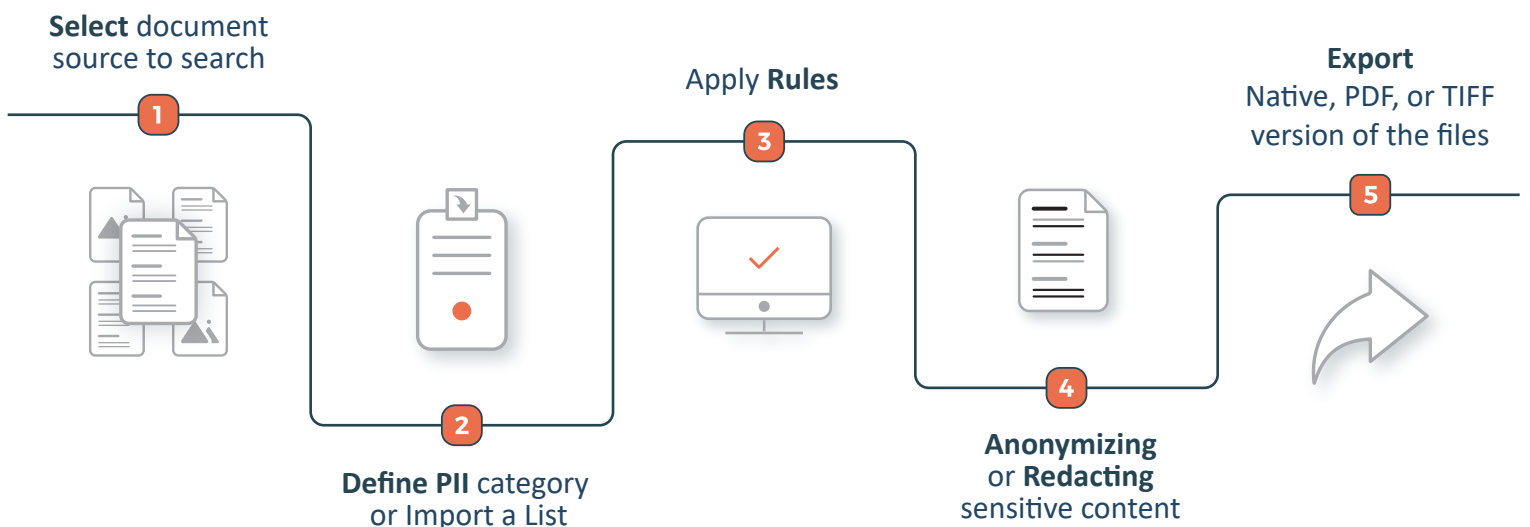

Universal searching supports the identification of Personally Identifiable Information (PII), PHI, privileged, trade-secrets and other sensitive information

SECURE

Easily redact, anonymize sensitive content within native documents. The software supports both manual and automated redaction of sensitive information.

PRIVACY BY DESIGN

I KEY CAPABILITIES

Complete Integration

ObscurePI seamlessly integrates with Relativity®.

Cohesive Search & Discovery

Easily run full-text searches across your Relativity® workspace to identify documents containing sensitive information.

Tag, Track, And Secure

Easily tag, encrypt, redact, anonymize, or delete.

Export

Export redacted documents in native, PDF, single page TIFF, multi-page TIFF formats along with a dat file.

Auto Redact PII or Privileged Information

Detects PII, PHI or other sensitive information and facilitates the redaction of this information on native documents. It also supports user defined mass redactions across a large number of documents.

Geo location Based PII Identification

Detects location information in the data and provides documents that contain potential PII.

Comprehensive Audit & Reporting

Track all user activity with audit logs and report on actions to ensure full defensibility and meet compliance requirements.

I KEY BENEFITS

- Cut time and costs out of reviews with automated redactions
- Directly redact privileged or PII within native documents
- Create efficiencies that drive down human error by redacting words, phrases, and text patterns simultaneously
- Secure privileged information is secure while retaining native documents

SAVE TIME – DRIVE SAVINGS – MITIGATE RISK
