

## Relativity Trace Announces Addition of Three New Data Sources to its Proactive Compliance Monitoring Application

*New data sources available via partnership with Globanet's Merge1™ suite of connectors*

**Chicago, Oct. 21, 2019** /PRNewswire/ -- Today at Relativity Fest, Relativity Trace, a proactive compliance monitoring app built on top of the Relativity platform, announced the addition of three new strategic data sources: Workplace by Facebook, Zoom Communications, and Google Drive Enterprise, part of the G Suite of products, through its partnership with Globanet and their Merge1 capture platform. Relativity Trace can now automatically ingest those data sources directly. The new integration will allow Trace customers to alerts on content from these major communication sources with Workplace by Facebook, Zoom and Google Drive Enterprise in addition to the more than 60 other data sources already offered through its partnership.

The alliance with Globanet further expands Trace's capabilities by adding the most important data sources for customers in highly regulated industries like banking and investment management. With Globanet's technology, users will be able to configure their Trace workflow to proactively capture data from frequently used communication sources. Trace then automatically extracts and indexes relevant text and runs automated searches to flag high-risk content to compliance teams.

"The communication sources employees use continue to grow, and it is important that our capabilities change and evolve with them," said Jordan Domash, GM of Relativity Trace. "We're excited to further expand our partnership with Globanet by offering automatic ingestion of these three important data sources so that compliance teams can better manage risk."

"Globanet is thrilled to announce the support for Zoom, Google Drive Enterprise and Workplace which are changing the way people and companies work and helping them stay connected wherever they go," said Sevag Ajemian, CEO of Globanet. "Relativity Trace customers can now benefit from these 3 new data sources to protect their organizations from compliance and e-discovery risk with Merge1 and Relativity Trace."

Google Drive Enterprise is available now, with Zoom available in November and Workplace by Facebook launching later in Q4. If you're interested in learning more about Relativity Trace, you can either [click here](#) or visit the Relativity Trace booth during Relativity Fest in Chicago for a hands-on demo.
