

Dynamis Power Solutions Names New CEO

The Woodlands, TX – United States – October 15, 2019 – Dynamis Power Solutions, an affiliate of Evolution Well Services, recently named Matthew Crawford as Chief Executive Officer.

Mr. Crawford joins the company after 13 years with General Electric holding various positions including Vice President of Sales, where he led the sales teams and business development efforts across the U.S. and Canada. During his tenure, he led the GE Oil & Gas North American Turbomachinery sales team with a total order plan of over \$1B, including growing the onshore unconventional business from \$0 to approximately \$100M in total orders in just over two years.

Says Evolution Well Services President, Jeff Morris, “Matt’s background in turbomachinery, rotating equipment and experience with multiple industries uniquely qualifies him to lead the growth of Dynamis in existing and new markets.”

“Dynamis is the benchmark for the mobilization of quiet and clean gas turbine power. Coming on the heels of the great success of the Evolution Well Services fleets, Dynamis was birthed in response to direct customer demand,” according to Crawford. “The quick mobilization/demobilization solution Dynamis offers, coupled with the 99.9% reliable LM2500 turbine, has gotten the attention of multiple industries from Oil and Gas and Industrial Data Centers to Agriculture and Commercial Grow Houses. With natural gas prices at all-time lows, the fuel saving potential is greater than ever.”

About Dynamis Power Solutions

Dynamis Power Solutions combines their ultra-mobile design with the clean energy and operating efficiency of natural gas powered turbines to meet the needs of customers in a variety of industries. With an average mobilization/demobilization time of less than 14 hours for power from 2MW – 35MW, Dynamis is uniquely positioned to quickly deliver the right amount of power in the right location. Dynamis units can run directly off of field gas, utilizing natural gas that may otherwise be flared. The units can also run off of CNG, LNG or diesel, if necessary. This flexibility in operations and transports enables Dynamis to answer the call of almost any industry requiring short- and long-term power.
