

## iPatientCare Received A Massive Response At GITEX 2019, Dubai

**iPatientCare's state-of-art Electronic Health Record, Hospital Information Management System, Patient Portal, Remote Patient Monitoring, and Telemedicine were highlights of the company's presence at this massive Middle East tech event.**

**Cincinnati, OH, October 28, 2019:** iPatientCare, a pioneer in **cloud-based ambulatory EHR**, revenue cycle management services, integrated practice management, and patient engagement solutions received an unprecedented response from the hospitals, clinics, and other healthcare-centric organizations at GITEX Technology Week 2019, held earlier this month.

At this mega tech event, iPatientCare successfully showcased its **in-depth knowledge and vast work experience** in the trending healthcare technologies including Mobile and cloud, Artificial Intelligence, Machine Learning, Big Data, etc. leaving a big impression on the attendees.

This grand technology event attracted more than 1,00,000 visitors with over 4,500 exhibitors from more than 140 countries and 5 days of world-class content featuring conversations and solutions revolving around mega technology trends. It was a big learning experience to understand the demands and trends of the region's healthcare sector along with the latest technologies shaping desired solutions for the healthcare providers.

"We have been working in US Healthcare for more than 20 years, so it was a great opportunity to be at GITEX and talk about our solutions. Here, our team had the chance to meet and connect with various potential strategic partners from the healthcare industry. It was fascinating to share and discuss viable healthcare IT applications into not only hospitals and clinics but also other public health systems. We have got some pilots already going on and we look forward to serving the Middle East and North Africa (MENA) region with our products in which we have made a lot of investments for so many years." said **Udayan Mandavia, Chief Growth Officer, iPatientCare/AssureCare**

### **About iPatientCare**

iPatientCare is a full suite of innovative healthcare products and value-added services that help physician offices, rural health clinics, and community/federally qualified health centers (CHC/FQHC) nationwide in improving the health of their patients, enhancing patient care through care management/coordination/analytics, and reducing costs of care delivery.

The awards-winning EHR, integrated practice solutions and value-added services, such as, the **revenue cycle enhancement** and quality improvement consulting, provide everything you need to control your practice operations, increase revenues, and provide better patient care.

The iPatientCare EHR - version 18.0, has received 2015 Edition ONC Health IT certification by Drummond Group, an Office of the National Coordinator-Authorized Certification Body (ONC-ACB), in accordance with the applicable

eligible professional certification criteria adopted by the Secretary of Health and Human Services (HHS). Full certification details can be found at the [ONC Certified Health IT Product List](#).

As part of its MACRA-ready solutions, iPatientCare has been recognized as a qualified MACRA-MIPS registry by CMS, and has a distinguished credit of being selected as a preferred EHR and medical billing software by more than 70,000 users nationwide, numerous hospitals/health systems, federally funded regional extension centers, and in the past by the US Army and NASA Space Medicine.
