NSF Certified Models	—	—	—	✓ ②	✓ ③	—

① **SANITRON®** Model S10,000C through S25,000C come equipped with mounting rack.

② **MIGHTY★PURE®** MP36C and MP49C are available with NSF®/ANSI 55 for Disinfection Performance, Class B.

③ **SANITRON®** Models S37C, S50C, and S2400C are certified to NSF®/ANSI 61 & 372. Model S2400C is used in modular form to build larger models.

- When used as directed to disinfect clear water, Atlantic Ultraviolet Corporation® water purifiers provide an ultraviolet dosage in excess of 30,000 micro-watt seconds per square centimeter ($\mu\text{WSec}/\text{cm}^2$).
- This list depicts options for 120v 50/60Hz operation. Consult factory for options with other power requirements.

Ultraviolet Air & Surface Disinfection Model Comparison	SANTAIRE® Ultraviolet Room Air Sanitizers 	Hygeaire® Ultraviolet Indirect Air Disinfection 	Sanidyne® Ultraviolet Portable Area Sanitizers 	AeroLogic® Ultraviolet Air Duct Disinfection Systems 	Sani-Ray® Germicidal Ultraviolet Recessed Fixtures 	SaniLIGHT® Germicidal Ultraviolet Irradiators 	Biolux® Germicidal Ultraviolet Fixtures 	NutriPure® Ultraviolet Sanitary Conditioners 	Monozone™ Ultraviolet Air Ozone Generators 
Made in the USA From U.S. & Imported Parts									
Principle of Operation	Utilizes a combination of germicidal UV lamps, filters and blowers for controlled flow of purified air.	Indirect fixture utilizing germicidal UV lamps and a series of specially designed louvers to direct UV rays to upper portion of room. Must be installed on wall at 7 feet or above.	Portable fixture utilizing multiple lamps providing direct UV rays to disinfect entire areas (large rooms) very quickly.	Equipment designed with germicidal UV lamps specifically for heating, ventilation and air conditioning systems. May be installed in new or existing ducts.	Direct germicidal UV rays are emitted in long, unobstructed lines providing areas and surfaces with destruction of microorganisms.	Direct germicidal UV rays are emitted in widespread path providing areas and surfaces with destruction of bacteria, mold, and virus.	A variety of small, low wattage fixtures for direct UV disinfection. Ideal for limited spaces.	Designed explicitly to treat the air in the head space of a liquid storage tank in order to prevent condensation and product contamination.	Germicidal UV ozone lamps generate high levels of UV radiation lethal to infectious microorganisms, removing mold, smoke, and other strong odors.
