Positronic Awarded Technology Manufacturer of the Year

5 November 2019

Positronic, a global manufacturer of high reliability electronic connector products based in Springfield, Missouri, USA, was recently presented the Technology Manufacturer of the Year Award by the Missouri Association of Manufacturers (MAM) at the 5th Annual Made in Missouri Leadership Awards & Appreciation Event.

Positronic was recognized as a leader in manufacturing for its interconnect solutions, specifically its Scorpion series connectors. The Scorpion series is being adopted by organizations who are developing the newest web technologies in the world, including demanding datacom applications. The connector series is also widely used in mission-critical military projects. Because of its modular design, the Scorpion series connectors can be developed for specific applications and brought to market much quicker than tradition products.

The Made in Missouri Leadership Award for Technology Manufacturer of the Year was centered on several key metrics – from the technology itself to the teamwork within the company. The Missouri manufacturing operations at Positronic are the center point of the company's global manufacturing operations, where strategic decisions are made for effective production of products. The award was based on measurable results of the technology, execution of the business strategy, effective leadership, business metrics, culture, teamwork and competitiveness of the product in the marketplace.

"Positronic is proud to continue its leadership in manufacturing, both in Missouri and globally," said Bill Gentry, Vice President of Business Development at Positronic. "The technology award displays the innovative spirit, commitment, and teamwork of our employees."

The Made in Missouri Leadership Awards (MMLAs) were developed to honor manufacturing companies and individual leaders that are shaping the future of manufacturing. Innovative companies and individuals in the manufacturing industry from across Missouri were recognized in all segments of manufacturing.

About Positronic:

Founded in 1966, Positronic is a global manufacturer of high reliability electronic connectors known for distinctive core capabilities, including solid machined contacts with low resistance/high conductivity for use in standard and quick--turn custom connectors. Key products include high power, D-sub, rectangular, modular and circular connectors. Customized solutions are available as well. Positronic is

known globally for the unique ability to quickly modify existing designs or create new products to meet application-specific needs. Visit <http://www.connectpositronic.com> for more details.

About the Missouri Association of Manufacturers

The Missouri Association of Manufacturers mission is to represent the economic, political, educational, and social interests of Missouri manufacturers and their employees, while promoting the betterment of the local economy and the environment, as a unified group, as well as the well-being of the manufacturing industry in Missouri.
