Voltonix Expands Again **Adding Ryan Huffman as Director of Strategic Partnerships**

Westerville, Ohio – Voltonix is pleased to announce that Ryan Huffman has joined the executive team as the Director of Strategic Partnerships. Ryan has an extensive background in leading customer facing organizations where success was contingent on developing long-term strategic relationships. Ryan is the past Chair of the Ohio Grocers Association where he helped implement industry best practices at the c-suite level and programs to identify and promote industry leaders. Ryan recognizes what it takes to understand customer expectations and work with employees, suppliers and partners to ensure key initiatives are executed and delivered. He also has had hands-on P&L responsibility, which will help him apply our data driven ROI strategies to Voltonix partners. With Ryan, Voltonix will be better equipped to help our strategic business partners understand and implement the powerful Artificial Intelligence applications in our portfolio.

Ryan is enthusiastic, he said, “Voltonix is bringing some really disruptive technologies to well-established markets that are ripe for innovation; I’m excited to be a part of that.” The CEO of Voltonix, Craig Kalie, is excited too, noting, “Our customers have been asking us for a better way to forecast maintenance or predict in-store device failures; with Ryan’s experience with compressor, kiosk, POS and IT maintenance challenges, we will be able to better help them respond to and tackle those challenges.”

About Voltonix:

Voltonix was established in 2008 to help companies take control of deployed assets – from installation to maintenance. Voltonix prepares site installations, predicts failures, protects assets and prevents future downtime issues through preventative lifecycle maintenance; a system designated as the “Four Ps” of deployed assets. For OEMs and Companies operating in the clinical, financial, 3D print, retail, kiosk and laboratory spaces costs and pain points are dramatically reduced.
