ValvTechnologies Recognized as Fittest Company in Houston at 2019 Fit Company Challenge

HOUSTON, TX – The Fit Company Challenge, presented by Fit Company Institute, is a bi-annual fitness competition designed to encourage employees to be active in the office and on the field. ValvTechnologies, Inc. the global leader in the design and manufacturing of zero-leakage valve solutions, took first place overall in the medium division at last year’s fall event.

Challengers from companies in the Houston area exhibited their mental and physical stamina as they competed against each other in a three-course fitness event designed to test their strength, agility and endurance.

“ValvTechnologies’ fit team trained over the course of three months, exercising together to complete a variety of obstacles that incorporated weightlifting, running and core strength,” said Julie Bodine, ValvTechnologies’ Director of Global Marketing. “Every year, we look forward to participating in the Fit Challenge. It’s an opportunity to highlight ValvTechnologies’ commitment to wellness and challenge ourselves to be the best.”
