

Certemy's instantly configurable licensing management software is for state licensing boards who wish to automate a predominantly manual licensure program or replace a custom licensure management solution that no longer meets their needs.

Benefits for Licensing Boards

Do more with less. Drive efficiency through automation. Build trust through transparency. Add or change any aspect of your licensure programs in minutes without IT staff or custom programming. Let Certemy proactively guide professionals through your licensure process, step by step, so you can spend less time answering the same questions for each candidate, and more time analyzing data and managing exceptions.

Efficiency | Put your licensure processes on autopilot. Centralize data and documents. Integrate systems. Improve data accuracy. Reduce paper handling. Minimize repetitive phone calls and emails.

Transparency | Build transparency and trust. Establish a common system of record for staff and licensees. Identify problems and trends using dashboards, standard reports, and our custom report builder.

Agility | Change and expand your licensure programs as your business needs evolve. Add or change any aspect of your licensure process, including forms, fees, and CE requirements, in minutes without programming.

Benefits for Licensees

Make it faster and easier for your licensees to acquire and maintain licensure.

Make Licensure Simple | Help licensees manage their licenses, track continuing education, and complete audits faster and easier than ever.

Stay On Top Of Renewals | Let licensees get automated alerts when licenses are expiring, or when you approve or reject their submissions.

Manage Everything In One Place | Allow licensees to manage documents and CE transcripts in a digital wallet, and share them with auditors or employers in seconds.

Why Certemy?

- ✓ **Most Affordable** | Our all-in-one pricing starts at \$5,000 per year for smaller licensing boards. No implementation or change fees. Setup, training, support, updates all included in one predictable annual fee.
- ✓ **Most Configurable** | Business users can change licensure workflows and data fields in minutes without custom programming or IT help.
- ✓ **Industry Expertise** | Staff includes former regulators who ensure that Certemy addresses your specific business needs and pain points.
- ✓ **Most Complete** | Put your entire licensure program on auto-pilot. Automate everything from applicant processing to board reviews and audits.
- ✓ **Fastest to Implement and Change** | Implement Certemy in as little as 30 days with no loss of data during the migration. Once live, change anything in minutes without programming or IT help.
- ✓ **Easiest to Learn and Use** | Let licensees use our modern, mobile-friendly user interface on any device. Let board staff use simple screens to manage, review, audit, and analyze your licensure programs.
- ✓ **Easiest to Integrate** | Integrate with your existing website using custom enrollment links and embeddable public registries. Integrate with other business systems, including LMS, AMS and HRIS systems.
- ✓ **Proven Return on Investment** | Cut admin costs by 50% by reducing paper handling, phone calls, and emails. Increase completion rates for new applications and improve retention rates for renewing licensees.
- ✓ **Most Secure** | Store your data in the cloud with the strictest security and encryption available.
