

O'Shares Global Internet Giants ETF (OGIG) Returned 36.62% in 2019, Strong Performance in its First Full Calendar Year

January 20, 2020 - Boston, MA - O'Shares ETF Investments announced O'Shares Global Internet Giants ETF (OGIG) returned 36.62% in 2019. View the [standardized performance for OGIG](#).

"OGIG is my top internet ETF growth investment. OGIG gives me over 60 of the world's largest fast-growing e-commerce and internet companies. Did you know that many Tech sector indexes now exclude companies like Facebook and Alphabet?¹ So we created OGIG to own very large "tech-enabled" e-commerce and internet companies with great revenue growth," said Kevin O'Leary, Chairman, O'Shares ETFs.

"We designed OGIG to own stocks of high quality, large and fast growing e-commerce and internet companies. Revenue growth is an effective quality measure when looking at tech stocks. Some older tech indexes now have slower revenue growth, under 10%. Secular mega trends in e-commerce and internet are driving revenue growth rates of over 30% in many global internet companies. OGIG is an ETF that invests in many of these stocks," said Connor O'Brien, CEO of O'Shares ETFs.

[OGIG](#) is the quality internet and e-commerce and growth investment provided by O'Shares ETF Investments, a family of ETFs that includes [OUSA](#), [OUSM](#) and [OEUR](#).

OGIG is an exchange traded fund (ETF) that seeks to track the performance (before fees and expenses) of the O'Shares Global Internet Giants Index (the "Target Index"). OGIG is a rules-based ETF intended to give investors a means of tracking stocks exhibiting quality and growth characteristics in the "internet sector", as defined by the index provider, O'Shares Investment Advisors, LLC.

O'Shares ETF Investments

O'Shares Investments provides ETFs for long-term wealth management, with an emphasis on quality across our family of ETFs. The O'Shares ETFs are designed for investors with objectives ranging from wealth preservation and income to growth and capital appreciation. Each O'Shares ETF reflects our rules-based investment philosophy, including quality as an important characteristic. O'Shares ETFs are all managed according to rules-based indexes, and all are listed on the New York Stock Exchange.

Press Release

Before you invest in O'Shares ETF Investments Funds, please refer to the prospectus for important information about the investment objectives, risks, charges and expenses. To obtain a prospectus containing this and other important information, please visit www.oshares.com to view or download a prospectus online. Read the prospectus carefully before you invest. There are risks involved with investing including the possible loss of principal.

Concentration in a particular industry or sector will subject the Funds to loss due to adverse occurrences that may affect that industry or sector. The Funds may use derivatives which may involve risks different from, or greater than, those associated with more traditional investments. A Fund's emphasis on dividend-paying stocks involves the risk that such stocks may fall out of favor with investors and underperform the market. Also, a company may reduce or eliminate its dividend after the Fund's purchase of such a company's securities. Returns on investments in foreign securities could be more volatile than, or trail the returns on, investments in U.S. securities. Exposures to foreign securities entail special risks, including political, diplomatic, economic, foreign market and trading risks. In addition, a Fund's investments in securities denominated in other currencies could decline due to changes in local currency relative to the value of the U.S. dollar, which may affect the Fund's returns. See the prospectus for specific risks regarding the Funds.

Companies involved with Internet technology and e-commerce are exposed to risks associated with rapid advances in technology, obsolescence of current products and services, the finite life of patents and the constant threat of global competition and substitutes.

Past performance does not guarantee future results. Shares are bought and sold at market price (not NAV), are not individually redeemable, and owners of Shares may acquire those Shares from the Funds and tender those shares for redemption to the Funds in Creation Unit aggregations only, consisting of 50,000 Shares. Brokerage commissions will reduce returns. The market price of Shares can be at, below, or above NAV. Market Price returns are based upon the midpoint of the bid/ask spread at 4:00 PM Eastern time (when NAV is normally determined), and do not represent the returns you would receive if you traded Shares at other times.
