

# Kinotech, a USA-based Lowcode / Mendix Implementation Pioneer, Announces Record Q4 Results.

Kinotech, a lowcode / Mendix implementation pioneer, announces record Q4 results. Revenue up 36% over Q4 as demand accelerates for Kinotech's Mendix enablement, expert services, architecture design, and business engineering services.

## SAN ANTONIO, TEXAS (PRWEB) JANUARY 28, 2020

Kinotech, a Platform Mendix partner offering agile custom software and systems integration services, announces record breaking results with revenue up 36% over Q4 2019. Full year revenue was up 27% over 2019. This was primarily driven by demand for our Mendix implementation services, custom software development, and Product Lifecycle Management (PLM) consulting. For 2020, we expect revenue growth of 40 - 60% and plan to grow our United States based team of elite consultants and Mendix engineers between 20 - 40%.

"We had our best quarter ever with growth of 36% over Q4 2019. During the quarter, Kinotech was recognized as the #1 Cloud Computing Consultants in Texas, moving up two spots from Q3 as rated by an independent analyst firm. As management teams begin to realize the impact Mendix can have on their organization we suspect they will turn to Kinotech as we are a trusted leader in the lowcode consulting space. Kinotech enables organizations from start to finish on their digital transformation journey through our proven, **results-driven process** we call the **Kinotech Digital Execution Strategy.**" says Michael Guido, CEO of Kinotech.

As a **platform Mendix partner, led by ex-Mendix engineers**, Kinotech's expert services are uniquely positioned to ensure organizations recognize the return on investment (ROI) that lowcode, agile development, and digital transformation promise leaders that are bold enough to take action. Kinotech clients continue to be thrilled with our expertise giving us an approval rating of 96% or 4.8 / 5 stars.

Kinotech remains at the forefront of the merging between the physical and virtual worlds and sees the relevance of our software **products** and **services** growing well into the future. Technology unemployment is near record lows (1.9%) while the demand for application development continues to outpace the supply of qualified developers. Demand is expected to increase 5x in the coming years.

As a pioneer and certified expert in lowcode implementations, Kinotech bridges the talent shortage while enabling our clients to implement solutions 10x faster, effectively doing more with less. By 2020, Gartner predicts nearly 50% of all applications will be built using lowcode technologies. Kinotech is strategically positioned to participate in this growth and enable customers looking to adopt these technologies.

As SAP ECC reaches 'end of life' in 2025 and customers migrate to SAP 4/HANA over the next five years, Kinotech is

Kinotech Cloud - #1 Cloud Consultant in Texas

“As a platform Mendix partner, led by ex-Mendix engineers, Kinotech’s expert services are uniquely positioned to ensure organizations recognize the return on investment (ROI) that lowcode, agile development, and digital transformation promise leaders that are bold enough to take action.”

uniquely positioned to help companies future proof their IT infrastructure as Mendix apps come automatically configured with SAP single sign-on. Custom solutions and extensions can be deployed to the SAP Cloud using existing SAP credentials. By keeping the SAP core 'vanilla' and using Mendix, the only lowcode platform that runs natively on the HANA data platform for customizations, businesses can significantly reduce maintenance costs while rapidly deploying the innovative business applications they need to compete in the digital era. About Kinetech:

Kinetech is a provider of custom enterprise software, built on Mendix, delivered through the cloud, with a focus on digital transformation. The company focuses on cloud, mobile, and integrated technologies that solve real client problems. Kinetech's service offerings are configured and integrated with other web services (APIs), platforms, and enterprise applications (CRM, ERP, HCM). Kinetech delivers its offerings via internet browsers and on mobile devices. The company designs, builds, and supports mission critical applications, client / vendor portals, and modernizes legacy systems. Its cloud offerings include the Digital Factory (Manufacturing), Kinetech PM (Construction / Project Management), GovTech (Government Technology) Cloud, and other bespoke solutions (Enterprise Cloud).

Key clients include the City of San Antonio (GovTech Cloud), DIRTT.net (Kinetech PM / Digital Factory) a publicly traded prefab manufacturer of custom interior and medical spaces, ninety (90) year old Guido Construction (PM Cloud), Top 10 Real Estate Brokerage, and an Inc 1000 Benefits provider (Enterprise Cloud).

Kinetech enables organizations to:

Design Microservices Architecture with the Mendix Platform

Digital Transformation Services including Product Lifecycle Management

Develop new digital products & services to enhance the customer experience and improve operational inefficiencies

Modernize legacy applications and improve performance with stabilized enterprise infrastructure (AWS, Azure, SAP Cloud, Cloud Foundry)

Extend and enhance the use of legacy systems by developing new functionality on cloud architecture that can evolve with the changing needs of business
