CAFEX

Collaborate beyond company boundaries

Shift to secure, always-on virtual workspaces

Chances are your company is using collaboration tools designed exclusively for internal teams, which presents challenges when working with clients, partners and other parties outside the enterprise.

CafeX is about making collaboration as easy and secure outside the four walls as within.

Use CafeX for internal team communication too, either standalone or through integrations with popular tools.
Before

Cross-company communication is fragmented across emails, calls and meetings. Calendars aren't visible for scheduling. Files and application data can't be shared easily. Guest access to content is limited.
After

CafeX's cloud platform brings together the right people, content and tools in secure, persistent workspaces that are just a click away and provide a unified view beyond the enterprise.

Bring it all together, maintain a single view

with the industry's strongest security
model for collaborative workspaces

Rich multi-company collaboration:
Collaborate outside the four walls as easily as inside. Share calendars, content and application data securely.

Instant meetings with context:
Just click or tap to join voice and video meetings - skip the download. Chat, share screens and access content in workspaces that persist.

No-copy content and app share:
Jointly view documents without having to email pdf files or download copies from your company drive (e.g. Box).

Secure and compliant:
Keep your data safe with the industry's strongest security model - enterprise keystore support, encrypted storage and workspace specific keys.

Bring your own storage:
Maintain complete control of your data, either in our secure cloud storage location or yours (AWS, Azure) in compliance with corporate policies.

Integrate your apps:
Pull in data to your workspaces from business tools like Slack, Salesforce, Jira, Smartsheet and many more integrations.
