BluBØX SECURITY, INC. ANNOUNCES ISSUANCE OF SECOND U.S. PATENT – WEB-CLOUD HOSTED UNIFIED PHYSICAL SECURITY SYSTEM

BOSTON, MA- FEBRUARY 6, 2020 – BluBØX Security Inc., (www.blub0x.com), a leading provider of cloud-based physical security solutions, today announced that the United States Patent and Trademark Office has issued US Patent No. 10,554,758 entitled "Web-cloud hosted unified physical security system." The patent covers 30 claims around its flagship product BluSKY, a hosted web-cloud platform of unified BluBØX security applications.

"We are so pleased to announce that BluSKY is now patented!" said Patrick Barry, CEO of BluBØX Security Inc. "It is so satisfying to finally own the patent to this industry changing invention. This patent represents the technology and architecture to deliver 4th generation security solutions. With this patent we look to help accelerate the adoption of real-time unified security systems that combine cloud, mobile, biometric, unified, open, smart, video, wireless and SIP technologies."

"Cloud-based Access Control and the application of Artificial Intelligence has enormous potential, offering groundbreaking capabilities to solve businesses' most difficult security challenges. Our latest patent in this area reflects our ongoing commitment to explore ways to apply the best technologies at the right times for our clients to achieve better business outcomes." Sean Dyer, Senior Vice President and Chief Software Architect at BluBØX Security Inc.

Pursuing patent protection of BluBØX's two premier products signals BluBØX's ongoing commitment to protecting their products and the technology innovations that underpin them. It also reflects BluBØX's highly unique and innovative approach to physical security. BluBØX will continue to take steps to protect its growing intellectual property portfolio and the rights of customers who use its derivative products and technology.
