RMT's Height-Adjustable Mobile Cart-Based Telepathology Solution

The innovative rmtConnect™ Mobile Cart-Based Telepathology Solution is a purpose-built collaborative tool to significantly improve the efficiency of medical procedures for better patient care. With simply the use of a browser, participants receive highly secure, live-dynamic high definition images from this mobile system for immediate decision-making. This compact mobile workstation consists of a high-performance RMT Multi-Protocol Appliance, an iServ encoding system, a 1080p camera, and monitor mounted directly onto an easy-to-roll mobile cart with optional height adjustment, Universal Power Supply, and optional Wireless Gateway Device. The pristine live-dynamic HD video securely streams to remote pathologists from any room the cart is located. Now you can immediately consult directly from the operating or procedure room. Ideal for medical facilities looking to save time and receive approved reimbursement assistance.
