# Clinically Proven Text Messages Have Shown These Patient Benefits:

Less Opiate Use

Clara users stopped their  
narcotics **10 days sooner**

Clara users had  
**more knee motion**  
3 weeks after surgery

Quicker Return of  
Knee Motion

# Clara Users Experienced these positive results:

Happier Patients!

**Higher patient satisfaction scores, more optimism with their progress, and more clarity of their surgical instructions**

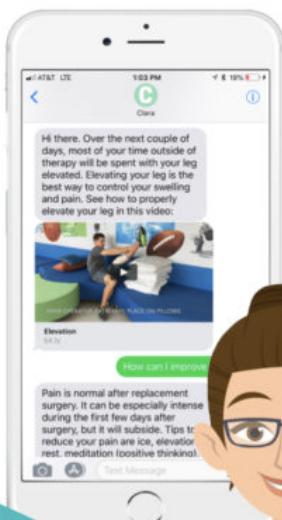

0% of Clara patients **visited the ER**, compared to 5% of patients in the control group

Fewer ER Visits
