

March 02, 2020

Alexandria, VA – E-9 Corporation (E-9) announces OneNet™ Emergency Management Platform As A Service (PAAS) solution based on Microsoft® Azure Government (Azure Gov).

E-9 announces the availability of the OneNet Emergency Management Platform that enables full utilization of Microsoft's Azure Gov Platform As A Service (PAAS). Built by an industry-leading company with decades of Emergency Management (EM), Public Safety, and Force Protection experience, the OneNet Platform enables end-users, as well as adjacent technology providers, to incorporate secure cloud-based solutions into their enterprise, agency or solution stack. Also, OneNet will enable companies with adjacent solution requirements the ability to incorporate Emergency Management or Public Safety needs into their solution portfolio.

“After several years of engineering development, we are incredibly pleased to announce the general availability of the OneNet Emergency Management Platform. E-9 staff continuously strive to provide our customers and partners with the highest level of innovation. We are excited to offer this robust innovative platform to our customers and partners,” – John Plott, E-9 President/CEO.

Built for government and commercial usage, the OneNet Emergency Management Platform incorporates leading-edge technologies to allow end-users and partners the ability to leverage the Microsoft Azure PAAS architecture. OneNet enables secure, reliable, and scalable solutions focused on providing all phases of emergency and non-emergency incident management including prevention, preparedness, response, recovery and mitigation. Any Municipal, County, State, Federal, or Department of Defense organization focused on Emergency Management, Public Safety, or Force Protection can leverage the OneNet Platform to incorporate secure cloud-based solutions into its solution stack. The OneNet Platform allows software solutions to dynamically scale without requiring expensive onsite and dedicated servers. Customers and partners can use OneNet to support mission critical continuity plans by leveraging the geo-disperse hosts resiliency and redundancy.

The OneNet Platform significantly lowers the upfront costs for EM, Public Safety, and Force Protection solutions while ensuring secure access to critical life/safety information where and when needed.

#### **About E-9 Corporation**

Founded in 2002, E-9 is a successful Veterans Affairs verified Service-Disabled Veteran-Owned Small Business (SDVOSB). The majority of E-9 employees are veterans and/or family members of veterans who are dedicated to “continuing the mission.” E-9 provides the government with quality Information Technology services and solutions, Intelligence Analysis, as well as Administrative and Management Consulting services and support.
