

Why Choose Us?

We're not just another software company.

Other software specializes in aspects of quality, inventory, or document management, which can only partially fulfill companies' needs & leaves them wanting more.

InstantGMP™ PRO is an "all-in-one" software that provides visibility, automates record-keeping, streamlines production activities & keeps manufacturing on-track without interruption.

Each software license comes with GMP SOPs embedded in our Document Management System (DMS).

Most importantly, our team personalizes your experience with dedicated account, training & support managers.

InstantGMP™ PRO

The First Affordable
All-in-One Manufacturing
& Quality Software Solution

InstantGMP™ PRO is a manufacturing & quality software solution specifically designed for hemp & CBD companies.

Let's start your transformation.

What We Do - Our Software's Advantages

Our software solution not only improves your level of compliance, organization, traceability, batch quality & transparency, but also provides you with a game-plan for success while decreasing human error.

Compliance & Validation

Our software comes fully validated & complies with GAMP 5, Parts 211 & 11.

Organization & Management

Our software is like TurboTax®. It organizes, manages & transfers your data between workflows.

Quality

Our software prompts users to verify batches, equipment & inventory quality to eliminate errors & improve consistency.

Traceability

Our software works forwards & backwards for complete traceability between batches & inventory.

Accessibility

Our software is cloud-based - this makes your data available to all users, anywhere.

Our Value & Benefits

- Fits into your processes
- Designed by regulatory & quality experts
- Instills the 3 T's: Track, Trace & Transparency
- Saves you time & money so you can produce more
- Helps your manufacturing operation become inspection & audit ready
- Manages inventory & batches in real-time
- Optimizes workflow efficiency
- Updates automatically with new features & versions
- Supplies ongoing training for both new customers & personnel
- Achieves zero to daily use in <2 months
- Imports current inventory

How We Work - InstantGMP™ PRO in a Nutshell

Material Requirements Planning (MRP)

- Allows users to plan production
- Calculates inventory needed for production
- Ensures materials are available for planned production
- Automates ordering materials for planned production
- Stages materials for production
- Provides picklists to link specific inventory to production
- Updates real-time inventory levels based off of activities

Implementation Package

Whenever a company adds any new software into the mix, it brings several challenges & potential disruptions to day-to-day operations. That is why we offer an optional implementation program that makes the transition easier. Our team guides your non-disruptive startup & provides numerous hours of expert guidance that:

- Supplements hands-on training with one-on-one consulting
- Maps workflow processes
- Makes on-site support available
- Rolls out to all users

GET IN TOUCH TO SEE A LIVE DEMONSTRATION – we'll show you how our software solution transforms your manufacturing & quality processes.
