The Ideal Cashless Payment Solutions in every situation

One Unique Payment Platform. The Payter P6x terminals are available in different form factors providing a flexible solution for various environments. The terminals support a wide range of vending machines and payment schemes in one device. The terminals are **designed for the unattended.**

Contactless Only

The P66 is a stylish designed NFC terminal based upon the European Vending Association specification that can be easily integrated. The ruggedized terminal is almost flush with Vending Machines which makes it less prone to vandalism as the traditional build-on-top terminals creating a professional and clean look-and-feel.

All in One

The P68 is a stylish designed terminal that supports all cards for secure, fast and convenient payments. This terminal supports Credit-, Debitcards and a broad range of loyalty cards.

- ✓ Contactless (Tap)
- ✓ Chip/Contact (Dip)
- ✓ Magnetic stripe (Swipe)

Front Mounted

The P66S is the ideal solution for machines which have minimum space to integrate a terminal such as snack walls and toilets. The P66S unit is split into two parts: card reader and communication unit. Ideal for small footprints; table top coffee machines and more.

Table Top

There will always be situations where it is impossible or unwanted to integrate a payment terminal. Therefore, Payter introduces a new universal accessory for its payment terminals: The Angle Add-on. The Stylish accessory, allows a cost-efficient solution for mounting the cashless terminals on countertops or besides a vending machine. The Angle casing can be delivered with an instruction plate for your customers.

Behind Glass

Contactless enables you to create a fully integrated solution and a smooth, vandal proof and elegant solution by mounting the terminal behind glass or perlex front up to 4-5 mm. Payter developed an OEM unit, ideal for outdoor

applications such as carwashes, Electrical Vehicle chargers, parking's, laundromats and more.

Easy to Connect

A Solution for every integration

With its 3G/4G and LAN connection and interfaces for serial, USB, MDB the P6x series makes the ideal flexible solution for unattended contactless transactions. In addition to the standard interfaces are the P6x terminals also equipped with additional input/output (potential free contact) interfaces enabling the control of peripheral devices such as turnstiles, doors, carwash systems, servo motors etc.

Security:

- 3 SAM modules,
- SSL TLS 1-2, SRED, DUKPT,
- 3DES, AES, RSA, SHA1
- Off-Line Transactions
- Deferred authorizations

Connections:

- MDB Level 3, EVA DTS, CO, Executive
- Cash Sales, Comms Gateway

Supports:

- Mifare, Desfire, SmartMX, NFC

4G/3G

LAN

USB

RS 232 (serial)

Pulse

EVA standard Dimensions

- Waterproof IP 65, Vandal Proof IK 10
- Operating Temperature: -10 °C - 50 °C
- Storage Temperature: -15 °C - 70 °C

Telemetry

The Payter Pdx terminals support EVA DTS Telemetry Processing. Telemetry enables machines operators to remotely monitor their machines. Telemetry technology can continually feed you fresh data about product movement, cash inventory and the physical condition of your machines. This valuable data can help operators manage their routes more profitably and take proactive measures to service their machines and handle maintenance issues. The Payter terminals can acquire this information from the Vending Machine. Payter adheres to the international standard EVA DTS.

Advantages of Cashless

- ✓ Increased consumer convenience
- ✓ Faster transactions
- ✓ Daily transfer of funds
- ✓ Increased security of transactions:
 - No Fraud or stolen cash
 - No losses as a result of foreign or fake coins

Company & Loyalty Card

The Payer terminals make it possible to give discount to staff or enable post pay functionality for your staff. The Company Card or Loyalty card can also enable free vend functionality for your visitors. The back-end system is hosted in the cloud to allow real-time modifications. The cards will be assigned to only work with the Vending machines you select. You will receive a weekly or monthly report of the consumptions used per card. The Payer terminals are prepared to accept your own Company Card or closed loop system.

- + Campus Card
- + Membership Cards
- + Discount Cards
- + Coupons

Terminal Management System

The Payer Terminals have a unique remote software download mechanism. This secure download feature enables the software and the settings of Payer readers to be adjusted safely and remotely. Expensive service visits are no longer required and adjustments to your software can be implemented quickly and efficiently.

Thanks to this feature a future proof system is created, in which changes in functionality can be applied easily, safely and quickly, while reducing the Cost of Ownership. Payer is happy to offer you the possibility of using this feature, through the Payer Terminal Management System.

Sales data

Our portal provides basic reports and graphs. Including raw data downloads into spreadsheets.

It is also possible to directly retrieve your data from the database through our API, this allows you to fully integrate the solution with your own system.

Data Contract

As part of an all-in-one solution Payer can provide a data contract for your terminals. The terminals will be supplied including 3G/4G modem, SIM-Card and service contract, creating a real Plug & Play solution, which works directly out of the Box.

QR/bar code scanner

The Payer terminals provides the possibility to be integrated with a QR/bar code scanner. These codes can be used to give discounts (e.g. for promotions) or do full payments.

Advantages:

- ✓ Simplification of the logistics processes
- ✓ Always in control of the terminal park
- ✓ Easy addition of new services
- ✓ Easy roll out process
