

LUME CUBE AIR VC

The world's first portable lighting solution designed specifically to improve Video Conferencing, Skype Calls, Live Streaming & Content Creation.

With video calls now overcoming audio as the primary form of communication for both business & personal interactions (Skype, Zoom, FaceTime, Webinars, WhatsApp, Instagram LIVE/Facebook LIVE/Youtube, etc), it's important to be clearly visible and always look your best. The Lume Cube AIR VC kit is the ultimate portable lighting solution that's mountable to any device and ensures you look great whenever the camera is on!

WHAT'S INCLUDED

1. LUME CUBE AIR LIGHT

Lume Cube patented design features over 1000 lumens to fully illuminate the subject during a video communication. The light is fully adjustable from 0-100% allowing the user to dial in the perfect amount of light. The Fresnel lens is designed to eliminate the hot spots and the 60° beam angle provides a wide wash of light eliminating shadows and bringing the subject to life.

2. SUCTION CUP MOUNT WITH 360° ROTATION FOR FORWARD & SELF FACING ILLUMINATION

The Suction Cup mount allows for versatile, damage free mounting to any smartphone, tablet, laptop or desktop. The rotating head allows for a quick & easy transition between forward facing and rear facing illumination to ensure your subject is quickly in the perfect light.

3. DIFFUSION BULBS FOR SOFTER & WARMER LIGHT

The included diffusers allow the user to fully diffuse or "soften" the light. The orange warming gel also "warms" the color of the light by reducing the kelvin temperature. This provides perfect, vibrant skin tones during a video call.
