

POWERLOK®

Rack Power Distribution

Greater Reliability

- Automated soldering from line input to each receptacle eliminates all types of mechanical connections.
- Independently evaluated to have 270% greater reliability over rack PDUs with mechanical terminations.

Universal Cord Locking

- CordLok universal cord locking with an industry leading receptacle density secures C13 and C19 cords.
- Single hand insertion/removal.
- No insertion resistance.
- Clicks when fully inserted.
- Use standard cords.
- Roll wheel with thumb to remove cord.
- \$1 per receptacle.

Slim Modern Vertical Design

- Only 2.18" wide x 2" deep.
- Greatest receptacle density.
- Highly visible group marking.
- Low profile receptacles protected from impact.
- Colors applied to cover at no cost on orders greater than 24 units.

Multi-Pack Packaging

- Reduced shipping costs and packaging waste.
- Four rack PDUs with up to 40' of cord in a small 22" x 5" package.
- 96 units per pallet for efficient handling at 65" stack height.
- Low profile receptacles protected from impact.
- 2-pack design for easy shipment of one or two units.

Angled Input Whip

- Input cord is angled toward the server rack exit to improve access to rear of server.
- Whip exit overhead or underfloor.
- Simple fixed and rigid design.
- Reduces bend radius.
- Natural egress from server cabinet.
- Improves access to IT equipment.
- Allows greater length PDU with more receptacles over PDUs with end cords.
