MCE Group plc. Celebrates 30 Years of Business

Stockton-on-Tees, UK. – MCE Group plc, a leading service provider for control, safety relief and isolation valves including actuation, is proud to announce it will be celebrating its 30-year anniversary this year. A global leader, MCE Group plc has been providing quality overhaul and repair solutions since 1990.

Located in Stockton-on-Tees, in the North-East of England, the primary facility operates in 8,000 square feet of space. The workshop has the capacity to support the largest of outages with 24/7 operations year-round. The facility is fully equipped with state-of-the-art equipment which includes hydrostatic test bays, shot blast and paint booths, lapping machines and instrument calibration/test rooms. MCE are also able to offer on-site maintenance services including in-situ relief valve testing, and with the bespoke, in house designed Valve Management Database, the history of all valve maintenance undertaken can be accessed at any time, which can assist with outage plans.

“Reflecting on the past three decades, I am very proud of what MCE has accomplished,” said William Morris, International Service Manager. “None of which would be possible without our exceptional employees and loyal customers. Over the years, we have obtained and retained many term contracts, and completed major outages with large reputable companies across the UK. MCE maintains a strong reputation and presence in the UK, with a focus on growing our business and customer satisfaction. As a direct result of our achievements, MCE is in the process of opening a second workshop to offer closer maintenance support to industry in the North West of England, with a 3,000 sq. ft facility located in Warrington. We are proud to be celebrating this milestone and look forward to the next 30 years.”

About MCE Group plc

MCE Group plc commenced trading in 1990, offering mechanical, electrical and instrumentation services to the power generation and process industries. Over the years, MCE has streamlined its activities, in order to concentrate our core business on the provision of valve shutdown and repair services. MCE is a major supplier of ValvTechnologies’ products, a leading global supplier of metal-seated severe service valves, with a proven performance record of providing field tested zero-leakage solutions.
