

iPatientCare expands its telehealth services to help doctors combat the COVID-19

As the nations across the world attempt to combat the spread of COVID-19 through widespread diagnoses and treatments, iPatientCare encourages its healthcare providers to take advantage of telehealth whenever and wherever possible, making its telehealth services easily accessible and affordable.

CINCINNATI, OHIO, March 28, 2020: iPatientCare, a pioneer in cloud-based **ambulatory EHR**, revenue cycle management services, integrated practice management, and patient engagement solutions has expanded the availability of telehealth services and other initiatives to help clients amid the coronavirus outbreak.

In this time of crisis, **telemedicine has a big role in fighting coronavirus**. Increasing the telehealth services across the nation would limit the potential for exposure and will ease the burden healthcare providers are facing during the pandemic. iPatientCare telehealth solution offers an easy-to-use video conferencing tools making it easier for doctors and patients to connect online. Providers can also send digital patient forms, charts, take notes, and e-prescribe — all through a HIPAA compliant telehealth platform.

"During these challenging times, every provider needs a streamlined telehealth solution to deal with the widespread coronavirus outbreak. iPatientCare's goal is to arm its providers with technology and support necessary to respond to the current healthcare crisis posed by COVID-19. We believe that we can help stop the spread of the virus by empowering providers, and hospitals with cloud-based care management systems and telehealth solutions to meet the rising demand for virtual care" said **Udayan Mandavia, Chief Growth Officer, iPatientCare/AssureCare**.

Providers interested in iPatientCare telehealth solutions can contact today at Sales@iPatientCare.com to talk to one of the IT associates to learn more about what iPatientCare can do to fulfill your telehealth technology needs.

About iPatientCare

iPatientCare is a full suite of innovative healthcare products and value-added services that help physician offices, rural health clinics, and community/federally qualified health centers (CHC/FQHC) nationwide in improving the health of their patients, enhancing patient care through care management/coordination/analytics, and reducing costs of care delivery.
