

BLAZINGBULL

Blazing Bull Portable Infrared Grill

- Blazing Bull is a revolutionary portable gas infrared grill that delivers premium steakhouse quality taste in any outdoor area.
- The overhead infrared burners heat up to 1500 degrees Fahrenheit and allow for a new innovative way of grilling. Searing the steak at 1500 degrees produces a delicious golden-brown crust without overcooking the inside and makes the steak incredibly juicy.
- Uses Schwank® Infrared Burner Technology - the exact same heating technology used by premium steakhouses such as Morton's, CUT432, Palm Restaurant, Del Frisco's, Ditka's and many others.
- Ready in minutes - Your steak is ready in as little as 3 minutes depending on thickness and your desired doneness.
- Adjustable side lift handle allows you to control the cooking temperature with 7 levels by moving the grill grate closer to or further away from the infrared burners.
- The drip tray below collects the meat juices and allows you to add butter, spices or oils and soak your steak in the tray after cooking to enhance the flavor.
- Portable - The compact design and sturdy carrying handles allow you to enjoy the juiciest food while tailgating at a sporting event, camping, or at a friend's house.
- Propane (LP) Gas - Connects to a propane cylinder, fires up in seconds with an electronic push button igniter and heats up to full 1500 degree temperature in less than 5 minutes.
- Accessories include a grill cover, Blazing Bull apron, cutting board, pizza peel, and pizza stone which allows you to convert your Blazing Bull into a pizza oven.
- Available for sale in USA and Canada - Free shipping to continental United States.

Price: \$1,250.00 USD

Dimensions: 25" x 17" x 15"

Weight: 62 lbs

Warranty: 1 year limited warranty
